Maximising the return on investment

Empowering your members wellbeing

- Right people: identifying and being able to invest in those with poor health habits, existing risks, hospital admissions, high claims costs or whose poor health will cost the most in the future – the place where you can gain the highest VOI
- Right program: content, level of commitment required (time and effort) and anticipated achievable outcomes. DW work with each of our customers to develop a tailored proactive approach of triage allowing us to move people into the right program at the right time.
- Right time: ability to push people into a health program when they are the right stage of change and ready to commit to taking action, ability to offer a year round services

What sets our solutions apart

Uniquely positioned to combine science, behaviour change and real-world data to deliver proven, scalable solutions that support patients to improve their health and empower GPs to deliver sustainable, preventative care.

Our Philosophy: Maximising your return on investment

Getting the right member on the right program at the right time

✓ Identify needs prior to hospitalization ✓ Reduce complex claims ✓ Reduce the risk of disease progression

Triage form to identify personal needs

We work to identify members at risk and employ proactive, upstream strategies to intervene early. By focusing on early detection, we aim to prevent disease progression, ensuring individuals receive the support and care they need.

Digital programs to suit all stages of health

Whether it's education, risk management, early intervention or chronic disease management we offer a wide range of solutions that our triage form helps filter your members onto the right program suited to their needs.

Human touch

Your members are our members. With a genuine human touch, we guide them every step of the way—assessing commitment, program fit, and readiness for change—to ensure they join the right program at the right time.

Customising your program

Whether it's a prevention, or CDMP, we tailor our programs to create a specific offering to meet your goals. With option to add the following items:

CSIRO Total Wellbeing Diet Cookbook range

Fast Start Meal Replacements

- Our Fast Start Shakes are simple and easy to use and help boost early weight loss
- For the first 3 weeks members will use meal replacements for 2 meals and then slowly transition to the whole foods program
- The 3 Week Starter Pack includes:
 - 42 meal replacements (vanilla, strawberry, coffee and chocolate)
 - A Shaker
- These shakes can be used in conjunction with any of programs suggested

We know nutrition, & we know health.

It's in our DNA. Digital Wellness was founded in 2006 by Scott Penn, building on three generations of innovation in weight management and preventive health. From pioneering Australia's weight loss market in the 1980s to transforming Weight Watchers AU/NZ into the most successful global unit in the 1990s, the Penn family has a long-standing legacy of health leadership.

What sets our solutions apart

Continuous evaluation from the CSIRO

CSIRO reviewed programs to examine the behavioural platform interactions enhancing development for improved health outcomes across more members.

100% digitally delivered with a human touch

Accessible, affordable health solutions for a range of health concerns, allowing for scalability and program integration into modern day life.

Access to digital tools & allied health support

Range of member informed scientifically developed digital tools that ensure accountability, engagement, & individualised support for better adherence.

Behaviour change modelled program

Focusing on educational tools enhanced decision-making and mindfulness strategies to improve emotional wellbeing and self-control, integrated touch points to solidify habits.

Nutritional based philosophy & approach

Focusing on a high protein, low GI philosophy developed and researched by the CSIRO and proven to increase long term weight loss success.

Peer community support & Group Webinar Coaching

Access to one of Australia's largest online peer-support communities, along with ongoing complimentary Group Webinar Coaching Sessions

Connected care model breaking down

A digital health program focusing on patient centric care and bridging the gap between dietitians, RNs, patients & health funds.

Outcomes beyond clinical results

Members report better energy¹, mental clarity¹, & confidence in managing wellbeing¹, boosted motivation², better sleep, and reduced stress³.

Effectiveness of an online weight management program for people with chronic disease delivered through a private health insurance model. Prepared by Dr. Gilly Hendrie and Danielle Baird.

Making better health possible — for everyone, for life.

For us, our mission has always been clear...

We're here to change people's lives by making a positive impact on their health.

We bring passion and energy to everything we do — driven by care, optimism, and a commitment to getting it done.

Together, we're building a model of care that's more accessible, affordable, and supportive, going beyond treatment to inspire hope and create lasting wellbeing.

Change you can count on

It's one thing knowing what to do and an altogether different thing getting it done.
Science is just the start. Getting the science into action is the real challenge.

That's where we come in. Over the past decade we've worked with the CSIRO to uniquely combine world leading wellbeing science with proven data driven behaviour change.

Sustainable results

Focusing on building long-term habits through a proven behaviour change model—delivering sustainable results that last well beyond the program.

Holistic approach

We go beyond just weight loss. Our solutions help members learn what a healthy diet looks like for their life – designed to fit their lifestyle, not fight it.

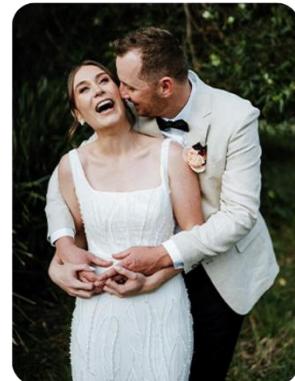

Member informed

A research-backed digital health platform informed by real member outcomes.

1.2 Million

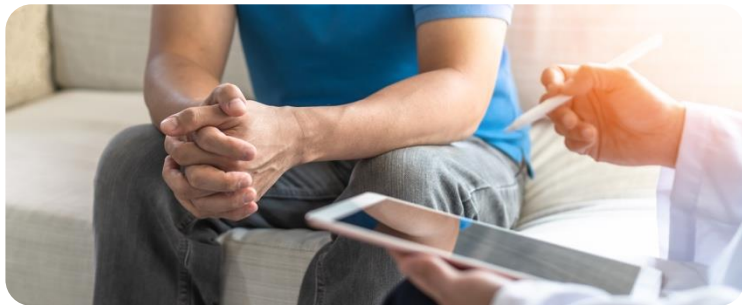

Australians impacted

With the goal of helping as many Australians as possible have access to, affordable health solutions.

Providing pathways to better health

How we work with our partners

Chronic Disease Management and Patient Support Programs

Self funded '*Always on*' discount offers for your members or employees

Expert lead & created Webinars, content and asset packages

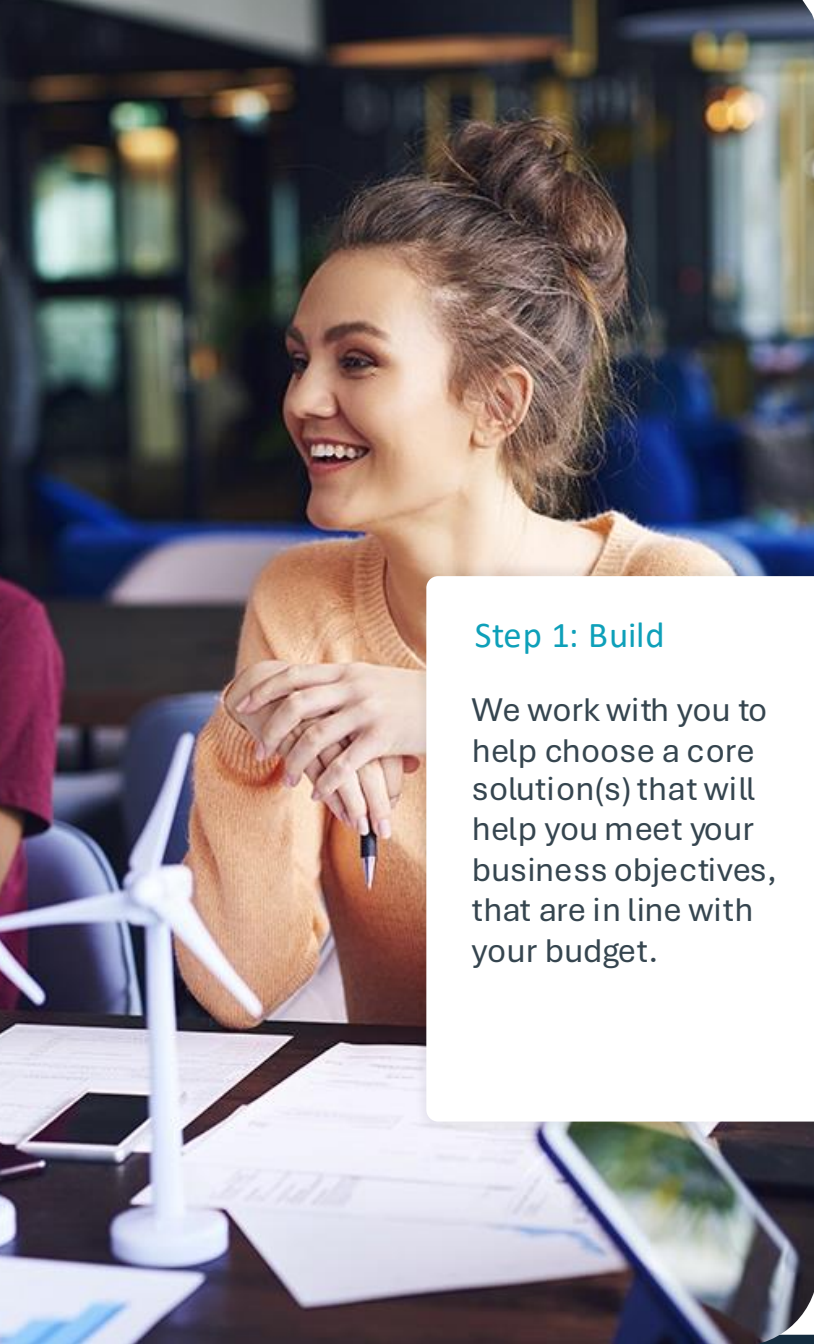

Volume based discounted employer funded programs

Healthy For Life programs to help maintain weight and improve health literacy

Marketing assistance, support, and cross promotion

How it works

We work with you to build the right solution for your clients, partner, members and patients.

✓ Your success is our success ✓ Lower costs ✓ Increased outcomes

Step 1: Build

We work with you to help choose a core solution(s) that will help you meet your business objectives, that are in line with your budget.

Step 2: Assess

Based on your budget, desired outcomes and Option Extra's requested, we work to create options to walk you through.

Step 3: Sign

Once a solution has been agreed on we move to contract stage and begin building out the launch plan with you,

Step 4: Launch Plan

Once an agreement is in place we begin introducing teams, and creating supporting assets including, marketing assistance, best practices, and staff training sessions

Step 5: Review

Monthly Catch-Ups with your dedicated Account Manager to review high level engagement metrics.

If ordered, cohort reporting is offered Quarterly and Annually*

Understanding you

We understand that success in weight management isn't just about the medication – it's about creating a holistic, patient-centred pathway that builds GP confidence, drives patient persistence, and delivers sustainable health outcomes.

Our combined solution closes the gaps in awareness, adherence, and retention – giving you the ability to scale responsibly while meeting regulatory and clinical expectations.

Scale with compliance

By pairing medication with a wraparound, science-backed lifestyle program, we unlock compliant, scalable marketing strategies that echoes telehealth leaders yet differentiates through evidence, credibility, and patient-centred care.

Retention uplift

At 2.9 months, average therapy stay is too short. With CSIRO's behaviour-change program, patients are supported to stay engaged for longer — helping shift persistence closer to the 4 month mark. unlocking stronger outcomes and persistence you can count on.

GP confidence

GPs are the critical gatekeepers. With 20 years of CSIRO science, dietitian-led coaching, and proven clinical outcomes, we give GPs the reassurance that prescribing your medication within our program is safe, effective, and truly patient-centred.

Evidence & outcomes

Our model delivers measurable weight loss, reduced hospitalisations, and sustained lifestyle change. Together we can build the world's best wraparound treatment, underpinned by real-world data to influence PHI partnerships and future government subsidy.

Understanding you

We understand that you're facing a challenge with the sustainability of ongoing costs associated with weight loss medications for your members.

While you're committed to continuing access to these medications, the long-term financial strain is a concern. Additionally, you're mindful of the potential downstream nutritional impacts these drugs could have.

You're looking for a solution that not only helps manage the pharmacy claims but also provides a credible supplement to these medications by supporting sustainable behaviour change.

The goal is to deliver evidence-based, proven outcomes that are as good as, if not better than, medication alone, ensuring the solution is viable for all members while addressing the ongoing cost pressures.

We believe we can offer the ideal complement to your existing pharmaceutical scheme through our scientifically-backed, behaviour-focused health programs.

Local Trust

Health Partners' strong local presence and deep community roots make them a trusted provider. We can build on this by positioning our solution as an extension of their trusted care.

Member-First Approach

As a not-for-profit, Health Partners focuses on member well-being. Our health program aligns by prioritising long-term, sustainable outcomes for members.

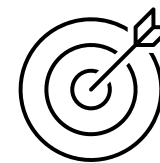

Value and Coverage

Health Partners delivers value for money and comprehensive care. We can reinforce this by showing how our program complements weight loss medication, offering holistic health management.

Proven Health Solutions

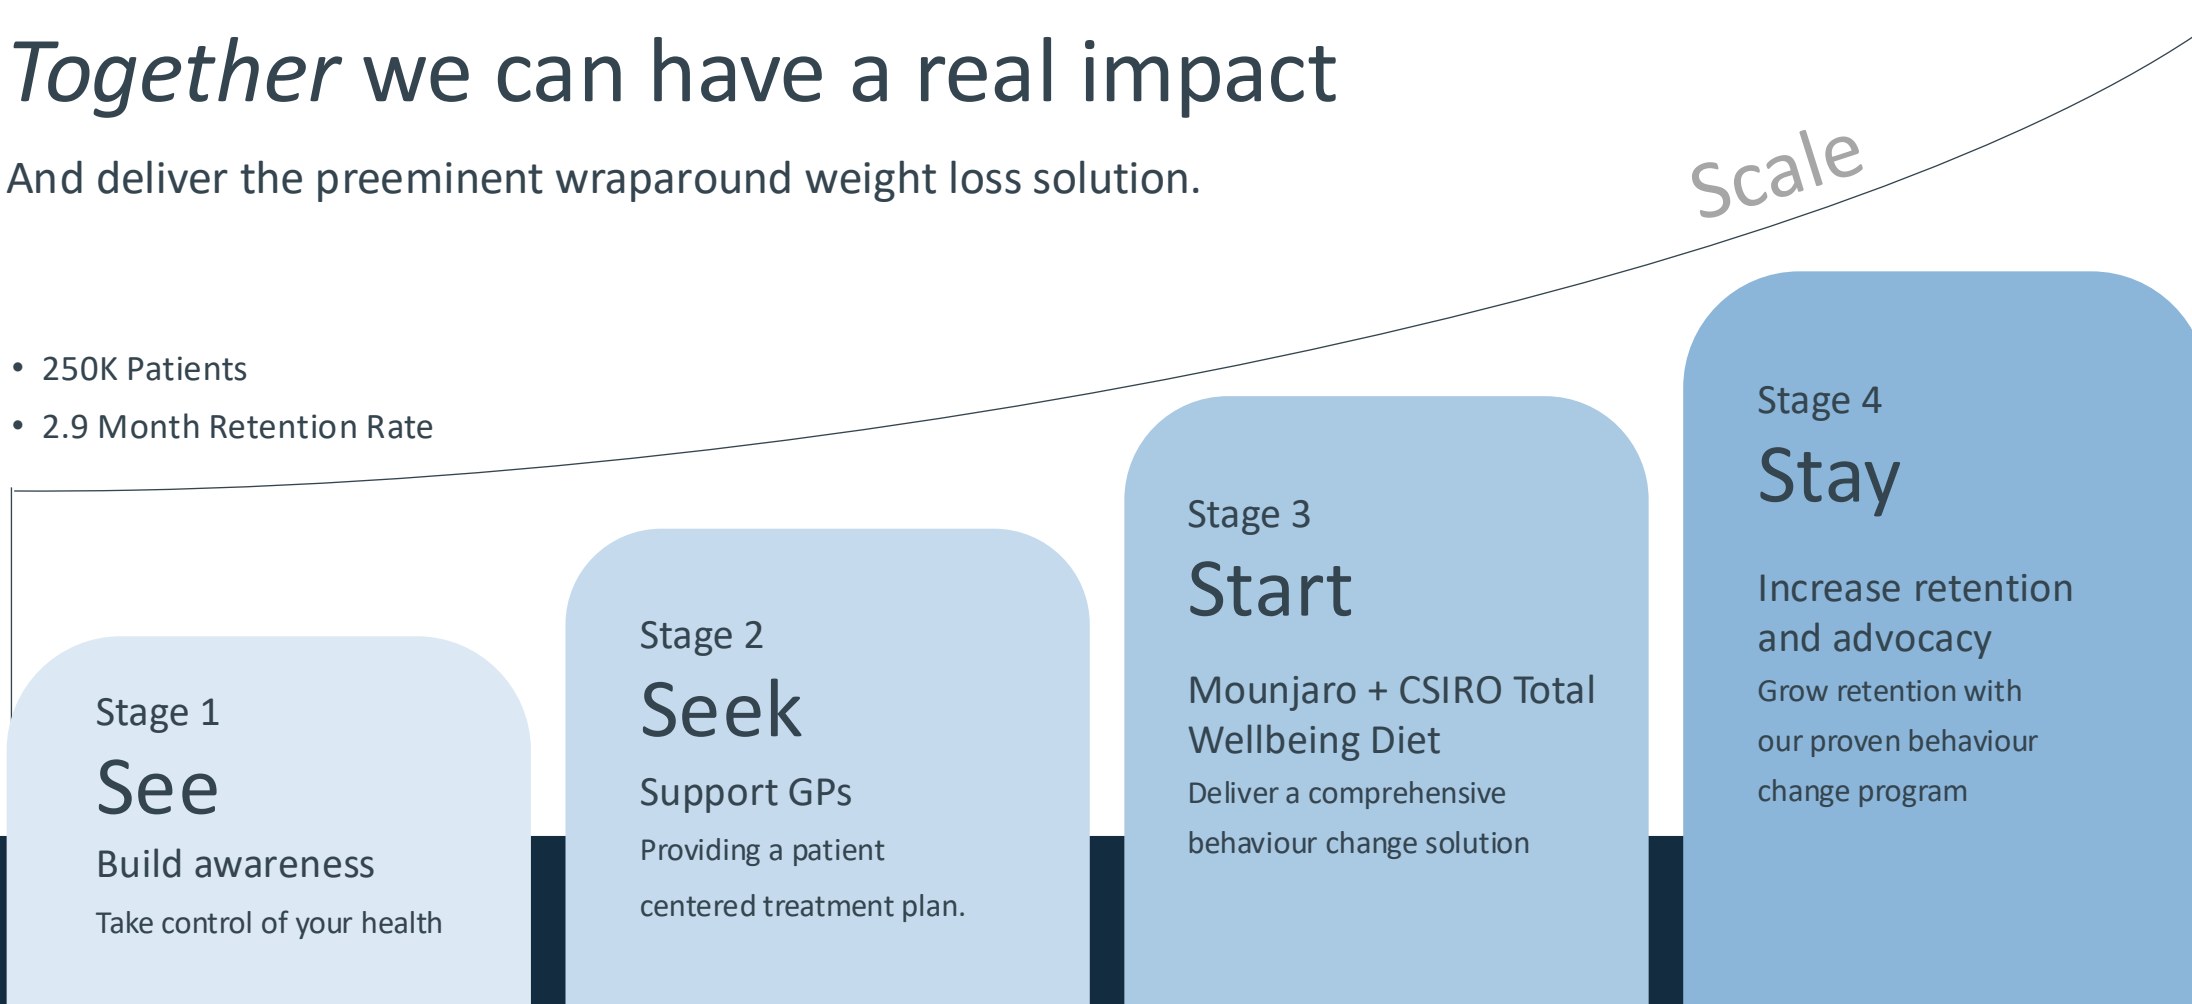

Health Partners' reputation for quality care is backed by proven results. Our evidence-based program aligns with their focus on delivering sustainable, credible health outcomes.

Together we can have a real impact

And deliver the preeminent wraparound weight loss solution.

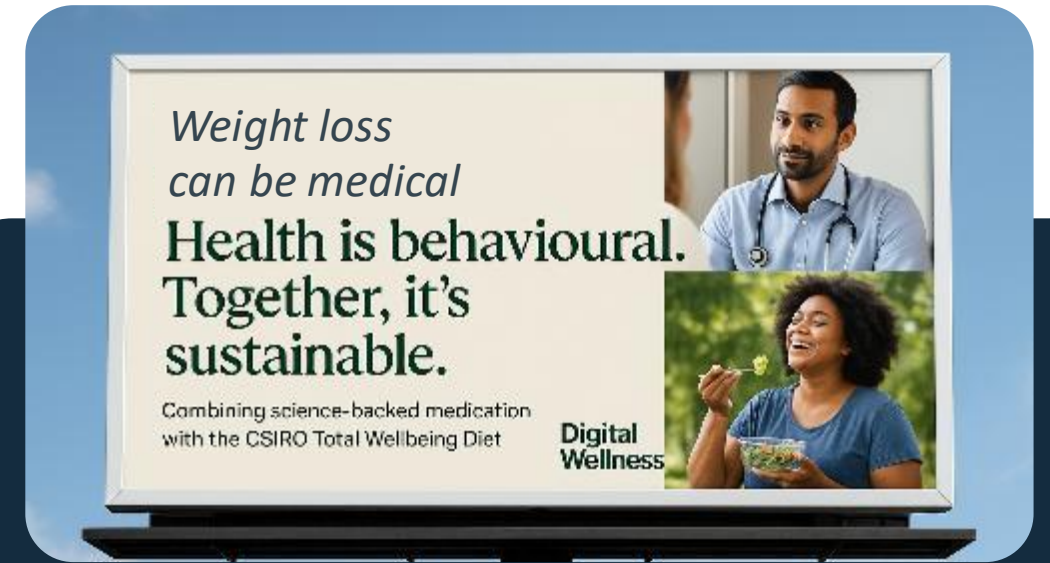

- 250K Patients
- 2.9 Month Retention Rate

See: Awareness

B2C Key Messaging Thematics and Framework:

We map directly to Eli Lilly's "Seek, Start, Stay" strategy to fill the gaps competitors leave behind. Together, we create a **compliant, evidence-based pathway** that supports patients at every stage of their journey.

Better together

Bridge medical treatment with sustainable lifestyle change program.

Mounjaro is more than just medication...It's now part of a comprehensive journey to long term health partnering with the CSIRO Total Wellbeing program to provide behavioural support to prevent relapse & support adherence.

Educate & Empower

Shift the narrative from 'just taking a drug' to 'take control of your health' through medication + a behavioural support program.

Educate on the long-term sustainable results that can be achieved.

Build Trust & Reduce Stigma

By combining a credible medical intervention with Australia's nationally trusted, evidence backed program we will reassure consumers that this is a holistic credible approach - not a quick fix.

Own the category with a complete solution to long-term sustainable weight loss.

Stand out in the crowd

A unique dual offering that combines clinical efficacy with sustainable lifestyle change from a global behemoth and a trusted Australian brand dedicated to solving the country's biggest challenge through science and technology.

The claims implications of obesity

Overweight, obesity and metabolic health are key drivers of chronic disease, cancer and musculoskeletal conditions — leading causes of life insurance claims, prolonged recovery and reduced work capacity.

For life insurance these risks lead to:

- Higher incidence risk
- Longer claim duration
- Delayed return to work
- Greater relapse risk

hospital activity.

Nutrition across the *'Health for Life'* continuum

Nutrition offers a practical way to influence the metabolic and functional drivers of many income protection and TPD claims. Excess weight and poor metabolic health contribute to cardiovascular and musculoskeletal conditions and are associated with longer disability duration and more complex recovery. As a result, structured nutrition support can help reduce risk, improve recovery capacity and support sustainable return-to-work outcomes across TAL populations.

Reduced future claims exposure

Lower incidence of cardiometabolic and musculoskeletal conditions linked to IP and TPD claims.

Shorter claim duration

Improved metabolic health, energy and physical resilience support stronger recovery capacity.

Stronger return-to-work outcomes

Better stamina, mobility and functional health improve work readiness and participation.

Reduced relapse and re-claim risk

Sustained behaviour change addresses underlying lifestyle and metabolic drivers.

Demonstrable member value

Evidence-based health support aligned to members' best financial interests and recovery outcomes.

Member informed digital health tools

Built on decades of CSIRO research and designed using real member behaviour and outcomes, our tools are purpose-built to help more Australians achieve lasting health results.

My Journey - AI Health Coach

The My Journey Tool is an AI-powered feature developed from CSIRO's latest research to help members set, track and achieve realistic, personalised weight-loss goals. It learns from real member behaviour to deliver smart, tailored prompts that boost adherence and support long-term success—making healthy change feel achievable and sustainable.

Flexible wholefood meal plans

Our flexible meal plans make healthy eating simple and satisfying. With a wide range of customisable plans—including gluten-free, family-friendly, and lifestyle-specific options tailored to your member's lifestyle. Following the CSIRO Total Wellbeing Diet principles: high in protein, low GI, and designed to manage hunger, reduce cravings, and support lasting change. Swappable meals and smart structure mean it's easy to stay on track, without feeling restricted.

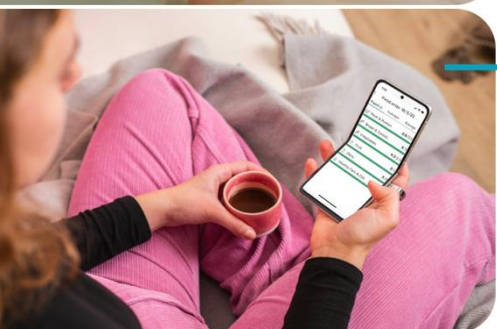

Programs for health conditions

Our plans support members across every stage of life and health—whether managing menopause, pre-diabetes, high cholesterol, high blood pressure, joint pain, or general health. Backed by CSIRO science, each program delivers nutritional support, practical tools, and education on each condition.

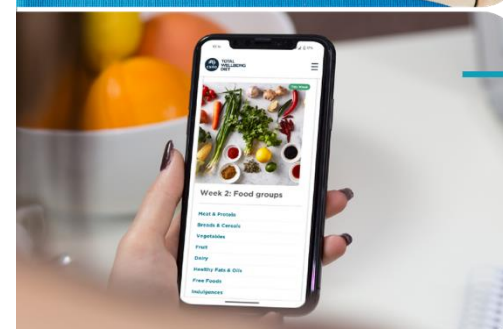

Group Coaching

Our Group Coaching sessions offer live, expert-led support to keep members motivated and informed. Led by our Accredited Practising Dietitians and health experts, these interactive webinars cover everything from getting started to navigating real-life challenges. It's a chance to learn, ask questions, and connect with the community, helping members stay engaged and supported throughout their journey.

Food, weight and exercise trackers

Our built in suite of digital tracking tools plays a vital role in behaviour change by building accountability and reinforcing healthy habits over time. From our Food & Exercise Tracker to the Weight Tracker, these digital tools make it easy for members to stay on track—day by day, meal by meal. Unlike other programs, we focus on food groups, not calorie counting to teach lifelong eating habits, not quick fixes.

Educational modules

Our suite of educational modules is designed to build knowledge, confidence, and lasting habits. Covering everything from nutrition, sleep, and exercise to emotional eating, mindset, and meal planning. With bite-sized, practical lessons aligned to weekly progress, these modules support members with the skills and strategies needed for long-term success—well beyond the diet phase, while also improving health literacy along the way.

Why it works

There's no secret ingredient -

It's a recipe that's been made with heart over decades of research.

✓ Guided by behaviour, powered by science

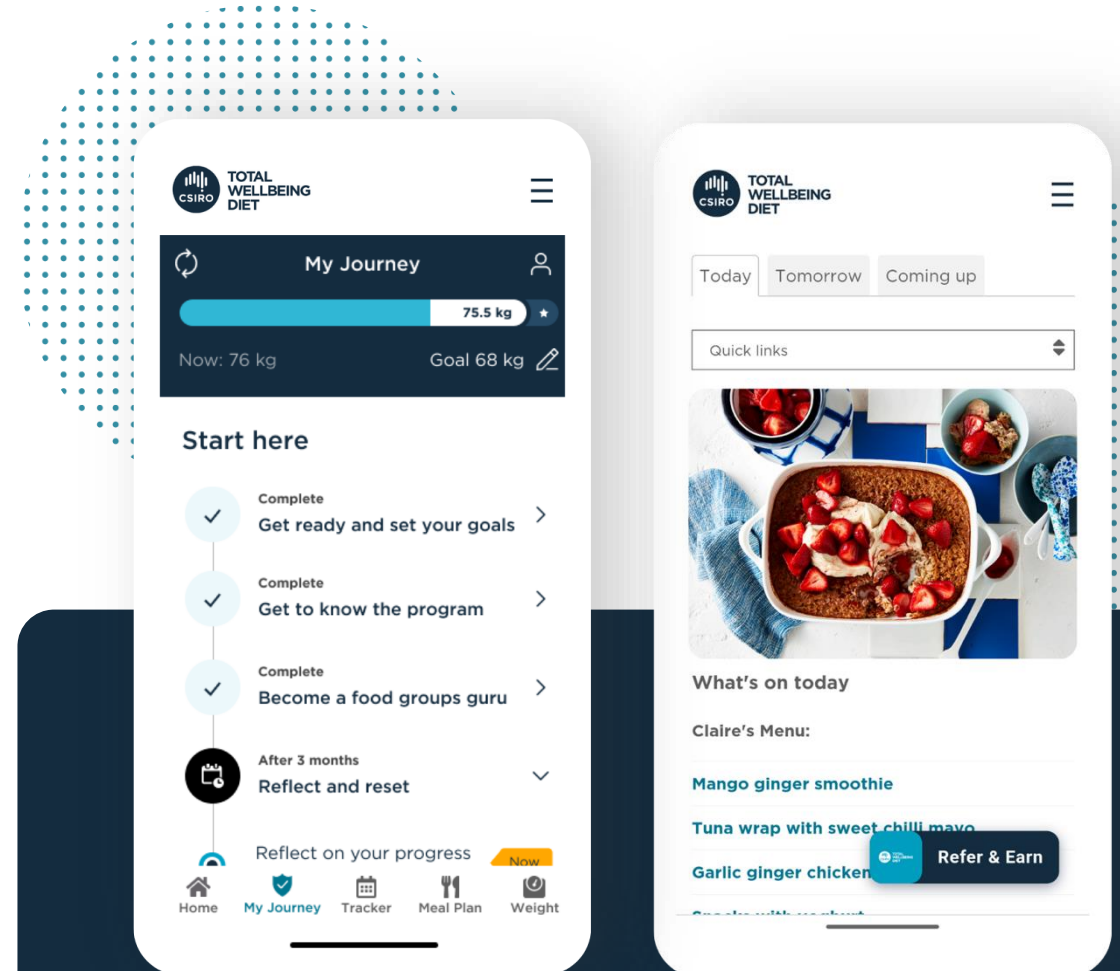

Built on decades of CSIRO science and the success of over a million Australians, the Total Wellbeing Diet is a platform that learns. By analysing member behaviour and outcomes, we evolve our tools — from AI-driven goal setting to peer communities — all mapped to the COM-B model to drive engagement, retention, and long-term success.

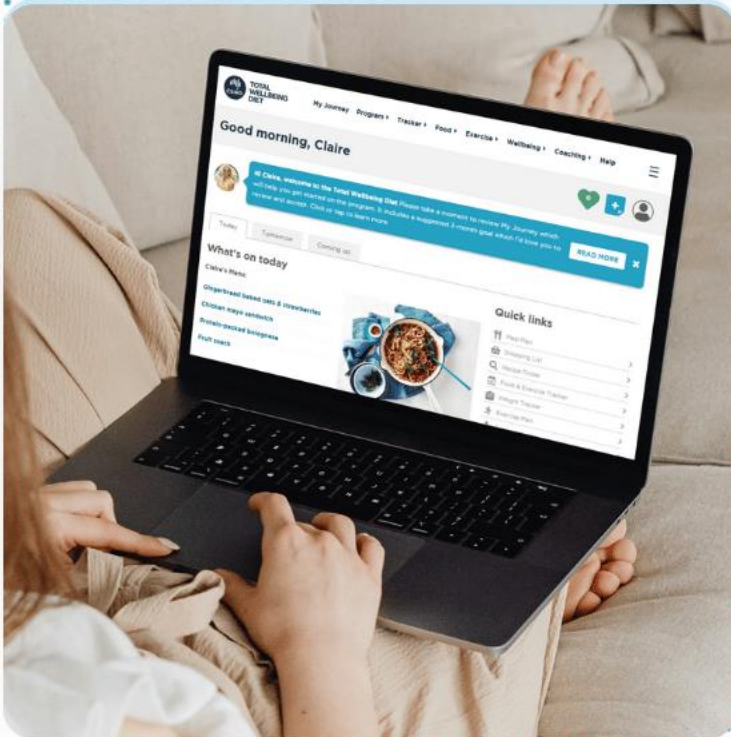

✓ Flexible by design

Our solutions fit seamlessly into people's lifestyles, families, and preferences. Grounded in CSIRO's high-protein, low-GI philosophy and focused on balanced whole foods, there are no restrictive rules — just flexible plans, bite-sized education, and practical tools that make healthier choices simple and sustainable.

✓ A human approach at scale

We blend digital accessibility with genuine support. Patients feel cared for and connected, with available member support, online group coaching and a supportive peer community — ensuring care is personal, not transactional.

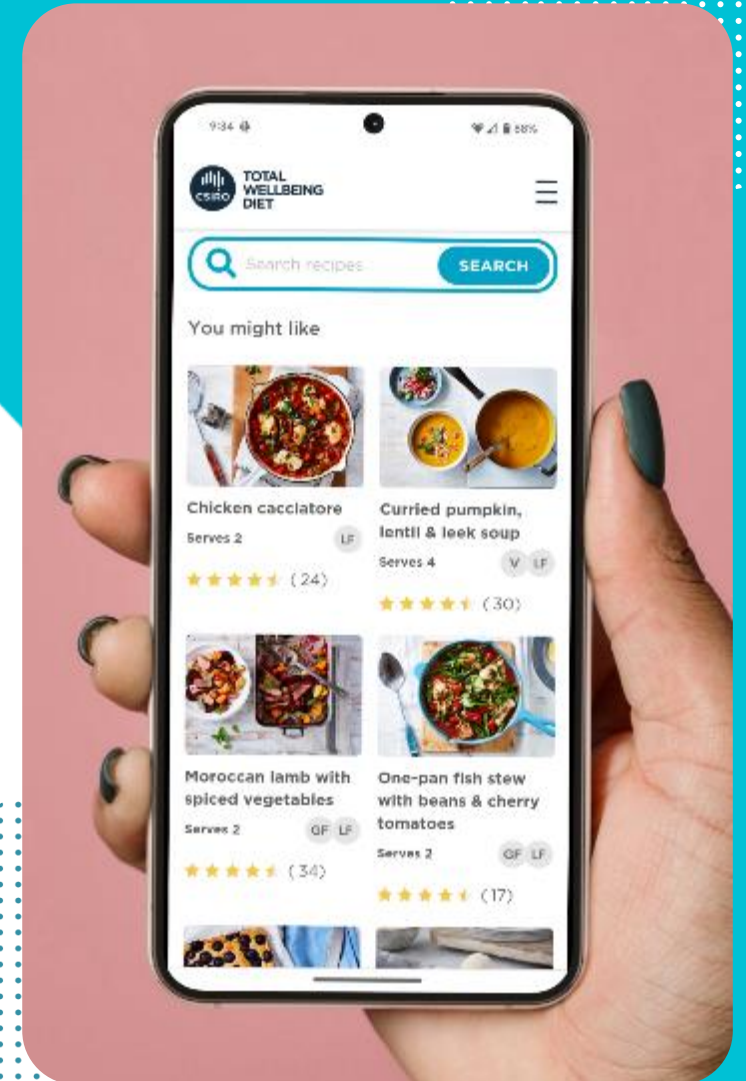

What's included:

- ✓ Access to the CSIRO Total Wellbeing Diet via 12 Week Plan
- ✓ My Journey AI Guide
- ✓ CSIRO researched and member informed program to help build habits
- ✓ Flexible recipes and menu plans based on the CSIRO high protein, low GI philosophy
- ✓ Live & past recorded Group Coaching Sessions
- ✓ Wholistic plans to follow that focus on your members health – not calorie counting
- ✓ Mental Wellbeing Tools

About the

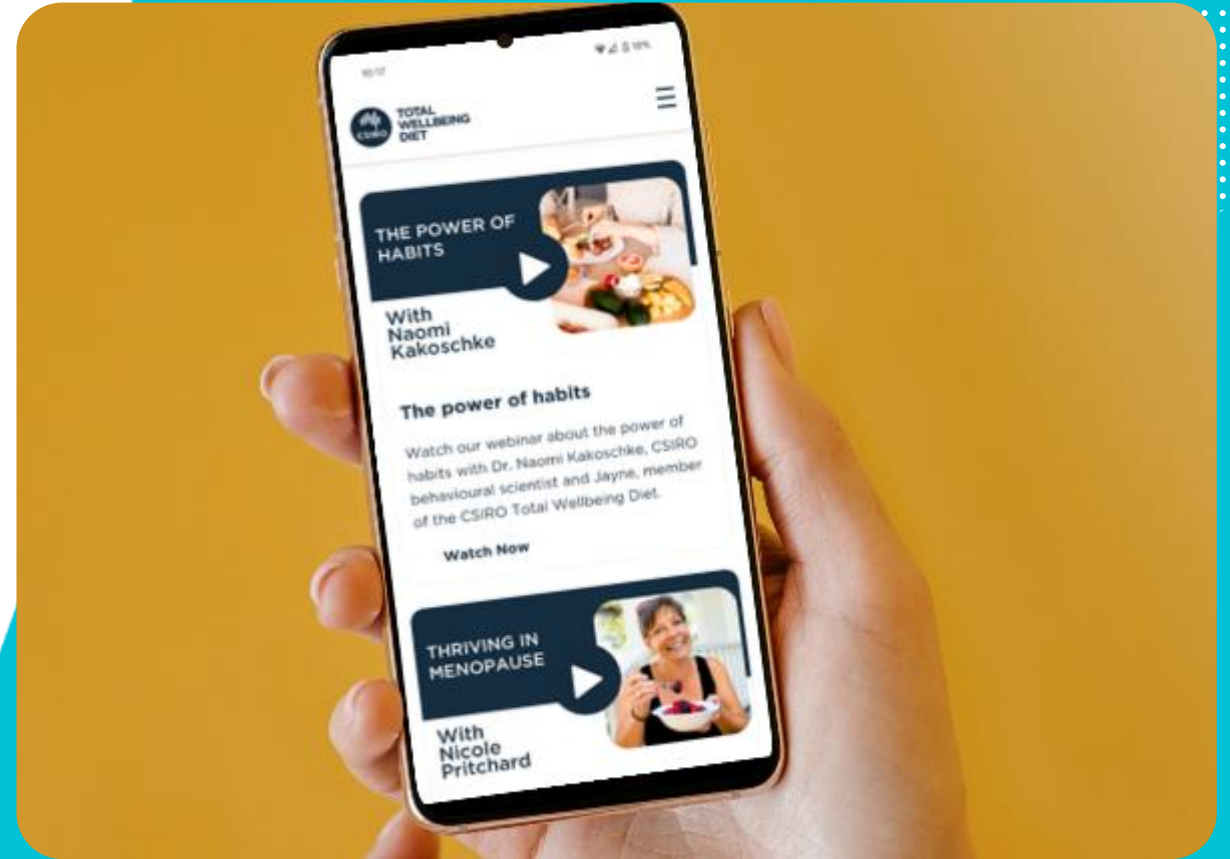

- ✓ Flexible meal plans that fit into everyday life
- ✓ Easy tracking tools to help track weight loss progress, which includes a Food and Exercise Tracker and Weight Tracker.
- ✓ Education modules designed to build knowledge, confidence and lasting habits
- ✓ Thousands of family & budget friendly flexible recipes
- ✓ Android and iOS companion apps gives customers a more convenient way to access their weight loss program
- ✓ Live and past recorded Group Coaching interactive webinars
- ✓ Positive psychology tools to boost wellbeing, such as kindness and gratitude
- ✓ Access to the exclusive Facebook Community Group

Evidence based behaviour change

Our biggest point of difference is in the approach we take to making sure our members are:

- ✓ Educated about nutrition
- ✓ Supported on their weight loss journey
- ✓ Able to transition off the meal replacement shakes and onto a varied whole foods diet.

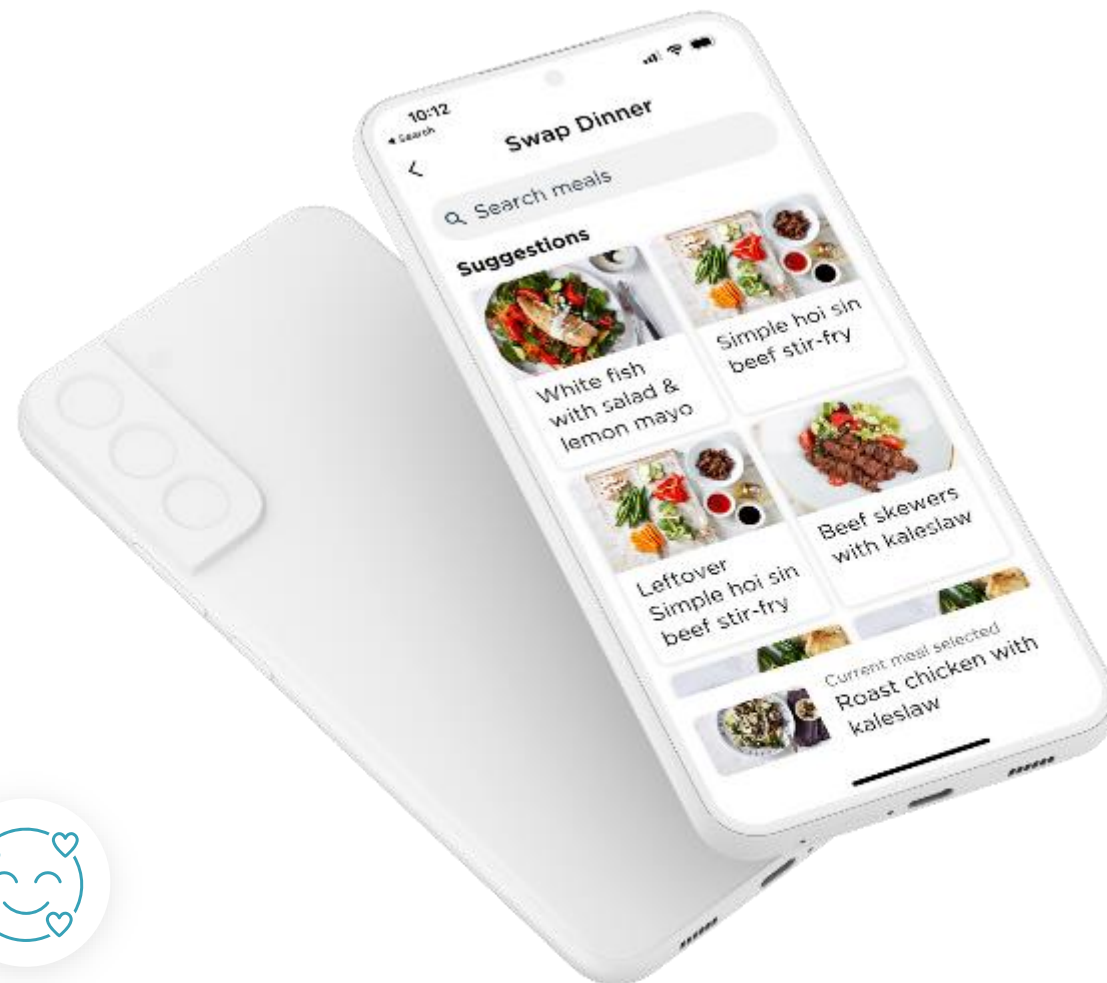

The foundation of all our programs

The CSIRO Total Wellbeing Diet is a scientific approach to weight loss which combines high protein meal plans with powerful online tracking tools.

Created by the experts at Australia's leading national science agency, the CSIRO, the diet combines the latest nutritional research with practical, easy-to-follow guidelines.

With over a decade of research and numerous success stories, the CSIRO Total Wellbeing Diet has proven effective for thousands of people. Our comprehensive approach not only focuses on what you eat but also on behaviour change, encouraging regular physical activity and mindful eating practices to ensure individuals can maintain their results for the long term.

Features of the digital program

Targeting the key pillars of behaviour change with accessible easy to use digital tools.

Behaviour change is not a simple concept. Nor is it a linear destination or something you can set and forget.

When in development, it is a delicate cyclical journey, where every day presents external factors and threats that render one's success vulnerable.

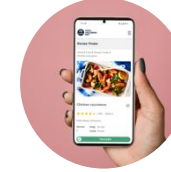

Real behaviour change is achieved when an individual:

- Has accessible support and accountability tools
- Is educated in strategies to manage relapses
- And has a supportive network of peers and professionals to help them stay on track.

AI Interactive Journey Guides

In-house AI Health coach with personalised AI My Plan.

This is science. This is the

We're making it easier for you to support your female members' health.

Many women experience weight gain, energy fluctuations and other physical and emotional changes during perimenopause and menopause—yet this life stage remains underserved in most health programs. To address this gap, we've developed the CSIRO Menopause Plan: a science-backed, nutrition-focused solution informed by the trusted principles of the CSIRO Total Wellbeing Diet.

Tailored specifically to support women through perimenopause and menopause, the plan helps members manage common symptoms, improve daily wellbeing, and reduce risk factors for chronic disease. It's designed to empower women with evidence-based strategies to take control of their health—at a time when they need it most.

Formulated for perimenopause & menopause

80+ new recipes tailored to hormonal & nutritional needs

High-protein, low-GI, high-fibre meal plans

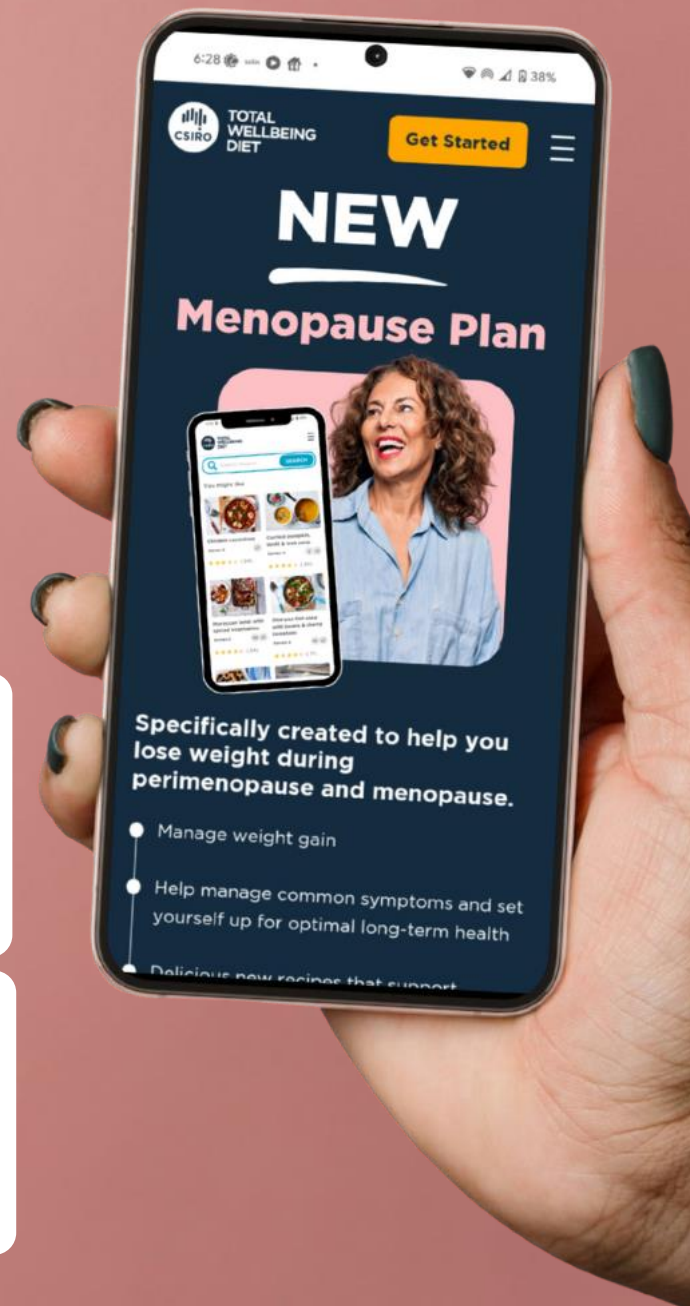

Guides for common symptoms like fatigue, brain fog & hot flashes

Expert-led tutorials, tracking tools and free group coaching

Reduce perimenopause and menopausal weight gain

Health programs tailored to members health conditions

Additional programs to help support health conditions for either CDMP or Primary Prevention solutions

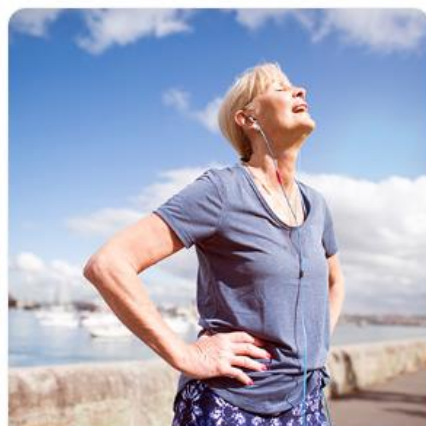

NEW Menopause

A nutrition-based approach to women's wellbeing

Our new Menopause Plan is grounded in the trusted CSIRO Total Wellbeing Diet principles. This program is designed to provide optimal nutrition for women to thrive during this major life phase.

Members learn how to eat for healthy weight management during perimenopause and menopause, how to stabilise energy and hormonal balance through food choices, and access a carefully curated meal plan designed to optimise nutrition during perimenopause, menopause and beyond.

Prediabetes and type 2 diabetes

Support your members in taking control of their health before complications arise.

This program is designed to help members manage their weight and improve blood glucose control—key factors in preventing disease progression.

Through targeted, evidence-based nutrition and tailored educational content, members learn how diet directly impacts their glucose levels. This program empowers them to make sustainable lifestyle changes, reducing long-term health risks and healthcare costs.

High cholesterol

Help your members manage cholesterol and reduce cardiovascular risk.

The High Cholesterol Program offers a scientifically developed, high-protein, low saturated fat meal plan, rich in whole grains, fruits, vegetables, and healthy fats.

This approach supports members in lowering LDL cholesterol and triglyceride levels, contributing to improved heart health. By equipping members with practical, sustainable dietary strategies, this program promotes long-term behaviour change that can prevent more serious cardiac events.

High blood pressure

Partner with us to support members in lowering blood pressure and improving heart health.

Our High Blood Pressure Program focuses on the clinically significant benefits of modest weight loss and improved nutrition. Members are supported to lose weight, reduce their blood pressure, and mitigate the risk of stroke, heart disease, and other chronic conditions.

This preventative approach helps your fund deliver measurable health outcomes while supporting members in achieving a better quality of life.

Joint pain

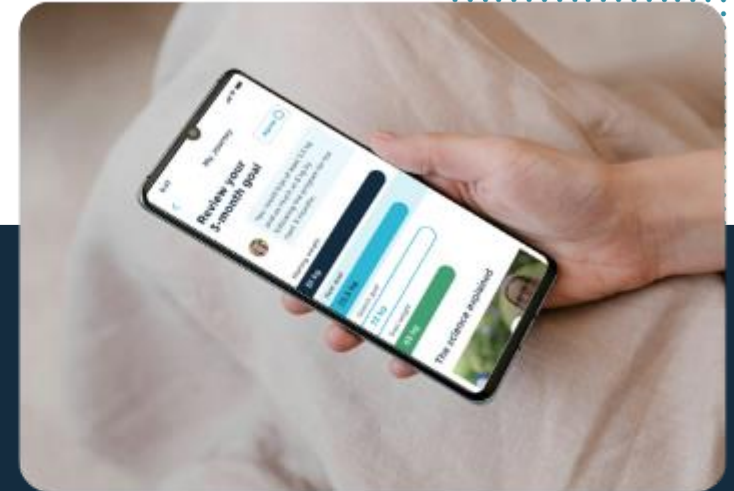

Improve member mobility and wellbeing by addressing joint pain through lifestyle change.

Excess weight is a major contributor to joint pain and musculoskeletal issues. This program is designed to support members to lose weight safely and effectively, with the goal of reducing pain, increasing mobility, and enhancing overall wellbeing. With a strong focus on nutrition, sustainable behaviour change, and empowerment, this program helps members reclaim their energy and freedom of movement—reducing reliance on medications and other costly interventions.

What is the CSIRO Total Wellbeing Diet?

There's no secret ingredient — the CSIRO Total Wellbeing Diet is a recipe of data, research and innovation, tailored with over 100 thoughtful elements:

- It's a flexible eating lifestyle program that supports your members to build healthier habits, understand what behaviors are good, bad, and within the healthy weight zone. The program combines data with high-protein meal plans, practical behaviour change strategies and innovative digital tools to help you, a member, track their progress and stay motivated.
- And the best part? It's designed to fit seamlessly into everything life, whether your member are busy or casual as you like to simply looking to put their health and well-being first.
- The program is available to members 1, 3, 6 or 12-month plans.

Health Coaching Sessions

Coaching support that drives employee wellbeing and sustainable results

Supporting employees to improve their health is one of the most effective ways to lift productivity, reduce absenteeism and strengthen overall workforce wellbeing.

Our Total Wellbeing Health Coaches are Accredited Practising Dietitians and members of Dietitians Australia. They understand the CSIRO Total Wellbeing Diet in depth and provide evidence-based support across nutrition, behaviour change and lifestyle planning. Their role is to help employees set realistic goals, stay accountable, and build long-term healthy habits that translate into meaningful health improvements..

What employees can expect from a coaching session

Each online session is tailored to the individual, offering:

- ✓ Personalised weight-loss and nutrition advice
- ✓ Progress review and recommendations to improve outcomes
- ✓ Guidance on getting the most from the CSIRO Total Wellbeing Diet platform
- ✓ Answers to program and meal-plan questions
- ✓ Motivation, accountability and practical strategies to stay on track
- ✓ Support for overcoming challenges and developing sustainable habits

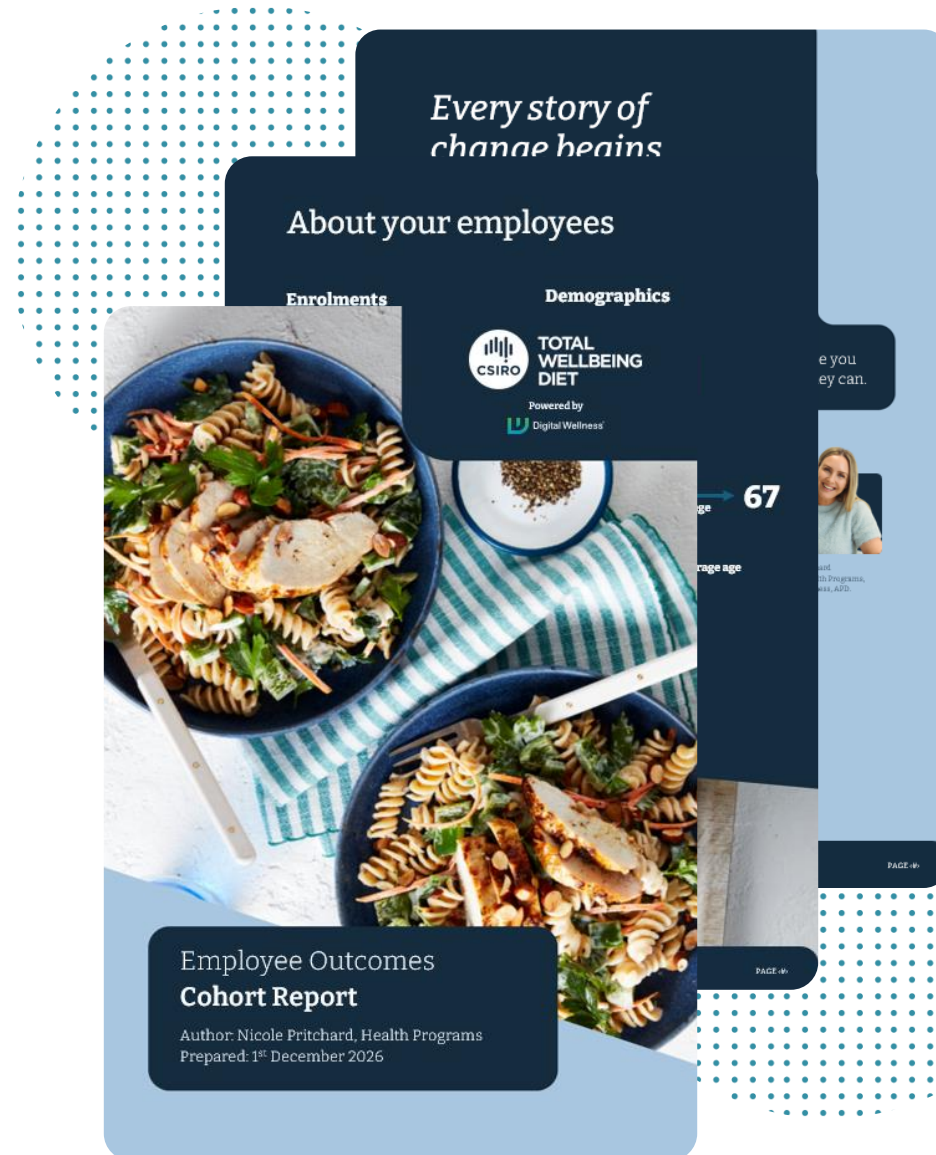

Cohort Reporting

Coaching support that drives employee wellbeing and sustainable results

At the end of each program cycle, your organisation receives a tailored, de-identified cohort report that brings your employees' progress to life. This reporting is included for cohorts with 201+ program codes, and can also be commissioned for smaller cohorts at an additional cost.

Your cohort report includes:

- ✓ Participation rate
- ✓ Top foods and exercises tracked
- ✓ Demographics of participating employees
- ✓ Average food diary, exercise and weigh-in activity per week
- ✓ Motivation for weight loss and the factors influencing behaviour
- ✓ Intent and commitment scores, highlighting readiness for change
- ✓ Average kilograms and percentage weight loss achieved
- ✓ Weight-class shifts from baseline to completion, demonstrating measurable improvement
- ✓ Interpretation and recommendations from Accredited Practising Dietitians, providing meaningful insights you can action.

How do Fast Start Shakes work?

Weeks 1-3

Get a Fast Start

- ✓ Replace breakfast and lunch with a Fast Start Shake
- ✓ Enjoy Total Wellbeing Diet diner
- ✓ Snack on fruit and unlimited vegetables

Weeks 4-12 (If a member continues)

Transition to Total Wellbeing Diet

- ✓ Introduce Total Wellbeing breakfast and lunch meals
- ✓ Option to replace breakfast with Fast Start Shake
- ✓ Gradually include more snacks, even indulgences

Fast Start Solution: A bespoke offering for emergency responders

Tailored for the unpredictable nature of shift work, our Fast Start solution combines convenience, scientifically-backed nutrition, and flexibility to help first responders achieve their health goals.

Convenient On-the-Go Nutrition

The 3-Week Starter Pack includes 42 meal replacement shakes (flavours: vanilla, strawberry, coffee, chocolate) and a shaker—perfect for responders with irregular schedules. Each shake is quick to prepare, making it ideal for busy shifts when proper meals aren't practical.

Kickstarts Weight Loss & Builds Confidence

Using meal replacements for breakfast and lunch in the first three weeks provides a boost in early weight loss, increasing confidence and motivation. Members are encouraged to snack on fruit and unlimited vegetables to stay energised throughout demanding shifts.

Phased Transition for Sustainable Change

Weeks 1–3: Two Fast Start Shakes per day, managing cravings and helping with rapid weight loss. **Weeks 4+:** Gradual transition to the Total Wellbeing Diet's whole-food plan, with the flexibility to continue using shakes as needed, ensuring sustained results.

Proven Results for Better Health Outcomes

98% of participants achieve weight loss with Fast Start, and **75% achieve clinically significant reductions in weight (>5%)**, improving health markers linked to hypertension, joint pain, and prediabetes. On average, participants experience a **7.4% reduction in body weight within 12 weeks**—essential for responders to maintain peak physical and mental wellbeing.

Adaptable to Any Program Option

Fast Start Shakes can be seamlessly integrated into any Total Wellbeing Diet program, making it easy for members to switch between meal replacements and whole foods depending on their shift patterns and energy requirements.

Fast Start Meal Replacements

Coinvent nutrition on the go.

A science-backed wellness product that empowers guests to take the first step toward better health. Purchased in either a 3-Week Starter Pack includes 42 meal replacement shakes (flavours: vanilla, strawberry, coffee, chocolate) and a shaker OR a 14 Sachet pack.

The Fast Start Program can be added on to either the 1 Month or 3 Month Program. They're perfect for occupations with irregular schedules or time poor employees. Each shake is quick to prepare, making it ideal for busy shifts when proper meals aren't practical.

How it works

Kickstarts Weight Loss

Using meal replacements for breakfast and lunch in the first 3 weeks provides a boost in early weight loss, increasing confidence and motivation.

Phased Transition

Weeks 1–3: Two Fast Start Shakes per day, managing cravings and helping with rapid weight loss. **Weeks 4+:** Gradual transition to the Total Wellbeing Diet's whole-food plan, with the flexibility to continue using shakes as needed.

Proven Results

98% of participants achieve weight loss with Fast Start, and **75% achieve clinically significant reductions in weight (>5%)**, On average, participants experience a **7.4% reduction in body weight within 12 weeks**.

Total Wellbeing Lifestyle Plan (CDMP)

Centred around your members & patients

Our evidence-based program helps members manage their chronic disease by combining telehealth sessions with nutritional science, modern behaviour change theory, artificial intelligence, the latest digital technology and reporting metrics.

- 24 weeks of the CSIRO Total Wellbeing Diet
- Health care assessment & 15 one on one coaching sessions
- Evaluation solutions
- Biometric tracking tools

Measuring success

KPIs and creating traction centred around your patients

This framework provides measurable KPIs for tracking both individual health outcomes and the overall effectiveness of the program. Frequent monitoring, participant engagement strategies, and cross-partnerships will ensure the program creates a sustainable impact and lasting member satisfaction.

Retention Rate

Goal: Ensure participants remain engaged throughout the program

KPI: 60% program completion rate

Drop off analysis: Monitor at which stage participants disengage and employ interventions.

Health Outcomes

Goal: Improve measurable health markers to demonstrate program effectiveness

KPIs

Weight loss: 5% or greater

Behavioural outcomes: increased fruit & vegetable consumption and increased physical activity levels.

Blood chemistry/blood pressure: tangible reductions seen in cholesterol (total, triglycerides and/or LDL) and blood pressure in members those with blood chemistry and/or blood pressure is outside of the healthy range at commencement (BP >140/90; TC >5.5; LDL >3.5).

Joint pain improvement: Self-reported pain reduction on a 10-point scale for those with diagnosed joint pain/arthritis .

Member Engagement

Goal: Ensure ongoing engagement to create habit formation and long-term lifestyle change.

KPIs: ≥75% of participants consistently log meals, exercises, and weight on the platform.

Member experience

Goal: Provide exceptional experiences to encourage adherence and satisfaction.

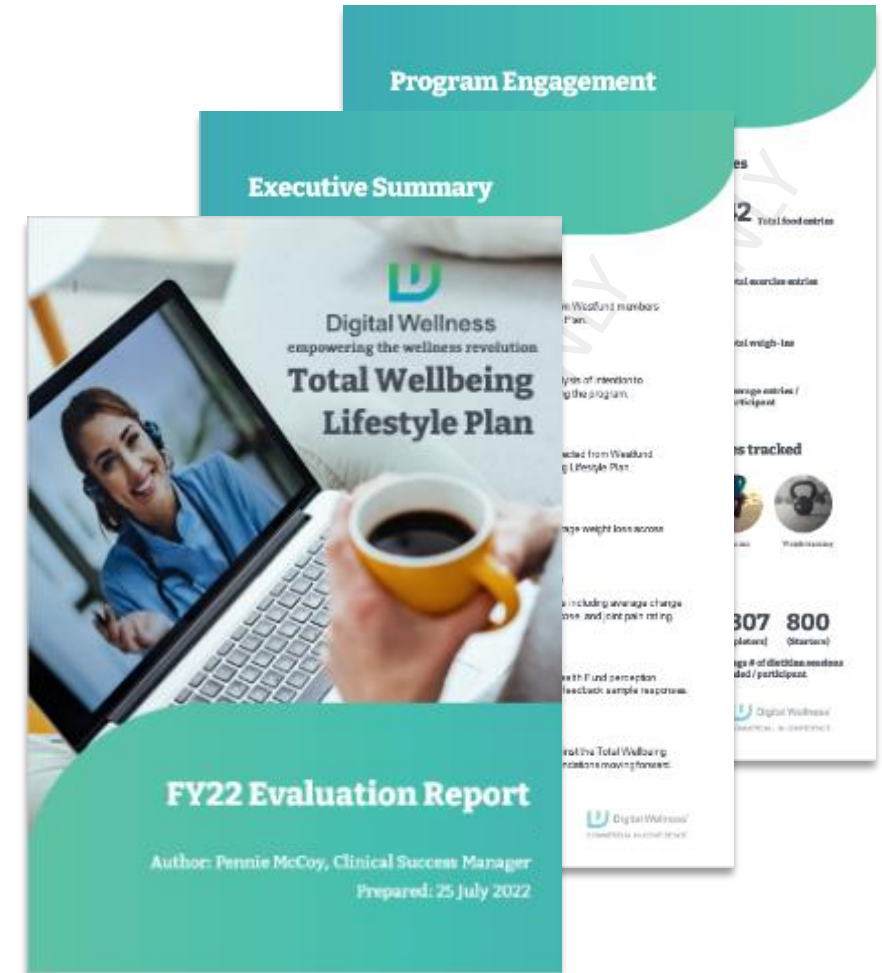

KPIs: Net Promoter Score (NPS): Maintain NPS ≥ 50, indicating strong member satisfaction and advocacy.

Health Coaching Engagement: 80% participation in at least 6 of 9 health coaching sessions.

Total Wellbeing Lifestyle Plan (CDMP)

Designed for early intervention, reversal and management

Embarking on a journey towards improved health and disease management is a multifaceted endeavour, and at Digital Wellness, we are committed to guiding individuals, every step of the way.

Through our utilisation of the CSIRO Total Wellbeing Diet, we facilitate tangible improvements in health, including weight loss, enhanced nutrition, and increased physical activity with CDMP Programs like Total Wellbeing Lifestyle Plan.

Terry lost 100 kg
In 2 years and maintained it for 4 years. Individual results may vary.

When it comes to reducing the financial burden of chronic disease and lifestyle-driven health claims, there are only two effective solutions: prevention and slowing the progression of disease.

We offer a complete suite of lifestyle programs delivered by registered healthcare specialists to help improve chronic conditions such as joint pain, high cholesterol, type 2 diabetes and high blood pressure.

The 24 week Total Wellbeing Lifestyle Plan is a PHI-compliant chronic disease management program (CDMP) that empowers members to implement online weight management and behaviour change solutions.

CDMP Eligibility criteria and chronic disease – statistics

Chronic conditions are not usually immediately life threatening but tend to develop gradually, becoming more common with age. Once present, they often persist throughout a person's life and require long-term management. When it comes to reducing the financial burden of chronic disease and lifestyle-driven health claims, there are only two effective solutions: prevention and slowing the progression of disease.

Chronic diseases are common amongst the Australian population, with an estimated 61% of Australians living with at least one long-term health condition in 2022* (ABS 2022 NHS). Data has shown that:

- One in two (49.9%) people had at least one chronic condition
- Mental and behavioural conditions (26.1%), back problems (15.7%), and arthritis (14.5%) were the most common chronic conditions, with 5.2% of Australians with heart, stroke and vascular disease related conditions.
- It is estimated that 38% of Australians had 2 or more long-term health conditions.

It is also known that having risk factors increases the chance of getting a chronic condition, which includes poor diet, obesity, high blood pressure and poor cholesterol levels.

Total Wellbeing Lifestyle Plan

Designed to for long term behaviour change

This 16 to 24-week program combines the scientifically proven CSIRO Total Wellbeing Diet with a Health Care Assessment with an RN and up to 15 one-on-one health coaching sessions with Accredited Practising Dietitians.

More than just weight loss, this PHI-compliant chronic disease management program focuses on long-term behaviour change, not quick fixes.

Backed by cutting-edge research from Australia’s national science agency, the CSIRO, this evolving program ensures the best possible health outcomes through data-driven innovation.

CDMP Program eligibility criteria

An example

The Eligibility Criteria – Chronic Disease Pathway*

Is a Defence member, with

A BMI ≥ 28 , and

Who has one or more of the following existing chronic health conditions.

- Cardiovascular disease
- Osteoarthritis and/or back problems and/or joint pain
- Type 2 Diabetes

The Eligibility Criteria – High Risk Pathway*

Is a Defence member, with

A BMI ≥ 28 , and

Does not have a chronic disease but is at high risk with all the following risk factors:

- lifestyle risk factors (poor nutrition, physical inactivity)
- biomedical risk factors (at least one of: high cholesterol, high blood pressure, impaired glucose metabolism), and
- family history of chronic disease.

Exclusion Criteria – (Applies to both pathways)

- Pregnancy
- If using the Fast Start Shakes, any existing health conditions that are contrary to a high protein diet[#], such as Type 2 Diabetes.

Example Invoicing Schedule

Invoice 1 – Initial Assessment

- ✓ Invoiced on attendance
- ✓ With a Registered Nurse
- ✓ Commitment screening
- ✓ Program suitability report

Invoice 2 – Planning & Care Coordination

- ✓ Invoiced on approval for program and member enrolment
- ✓ Patient recommendation letter
- ✓ Program set up
- ✓ Program Access
- ✓ Care-coordination

Invoice 3 – 1 Hour APD Welcome Session – Care Plan

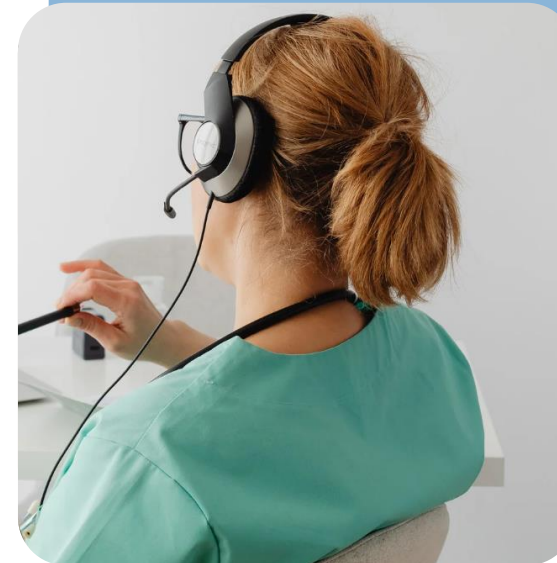

- ✓ Invoiced either monthly on attendance OR at the same time as Invoice 2 if packaged agreement.
- ✓ Care plan with APD
- ✓ Goal setting
- ✓ Program orientation

Invoice 4 – 30 minute APD Health Coaching Sessions

- ✓ Invoiced either monthly on attendance OR at the same time as Invoice 2 if packaged agreement
- ✓ Ongoing support and strategies throughout the program up to 15 sessions.

Invoice 5 – Post Intervention Assessment

- ✓ Invoiced on completion of the program
- ✓ Care plan
- ✓ Program orientation

Recommended Eligibility Criteria

- ✓ Have a BMI of ≥ 28 kg/m² AND
- ✓ A Chronic Disease Diagnosis that would benefit from weight loss. Including, but not limited to: Cardiovascular disease, Osteoarthritis, Type 2 Diabetes, or Obstructive Sleep Apnoea, Respiratory Conditions (COPD/Asthma). OR
- ✓ Is at high risk with all the following risk factors:
 - ✓ Lifestyle risk factors (including, but not limited to, poor nutrition, physical inactivity, smoking or alcohol misuse); and
 - ✓ Biomedical risk factors (at least one of: high cholesterol, high blood pressure, impaired glucose metabolism, chronic pain or excess weight); and
 - ✓ Family history of chronic disease.

Example Eligibility Framework

- Members must hold an eligible Defence Health Combined Policy (Hospital & Extras) to access the services as per CDMP eligibility policy with the minimum 2 month waiting periods served.
- Members must have a weight status [BMI $\geq$ 28 kg/m²]
- Is at high risk with all the following risk factors:
 - Lifestyle risk factors (including, but not limited to, poor nutrition, physical inactivity, smoking or alcohol misuse); and /or
 - Biomedical risk factors (at least one of: high cholesterol, high blood pressure, impaired glucose metabolism, chronic pain or excess weight); and
 - Family history of chronic disease.

Diagnosed Chronic Disease / High BMI

- Members must hold an eligible Defence Health Combined Policy (Hospital & Extras) to access the services as per CDMP eligibility policy with the minimum 2 month waiting periods served.
- Members must have a weight status [BMI $\geq$ 28 kg /m²] plus a Chronic Disease diagnosis of either:
Cardiovascular disease, Osteoarthritis, Type 2 Diabetes, or Obstructive Sleep Apnoea, Respiratory Conditions (COPD/Asthma).

Long term weight loss key findings

Since launching in late 2014, the CSIRO Total Wellbeing Diet online has had a total of 154,656 unique members, of which 40% were considered “Stayers” (n=61,514). Stayers were those members who had paid for a membership for at least 12 weeks and had a valid weight in the system at baseline and at 12 weeks or beyond.

Among Stayers, 6,602 members had a valid weight in the system at baseline, 3, 6 and 9 months and 1 year, allowing pattern of weight loss over time to be explored (6,602/61,514=11%).

This subgroup of members lost:

Success of the Australia's favourite diet – The 12 Week Self Directed Program

In one of the worlds largest scientific studies of a weight loss program, CSIRO reveals the secrets behind Australia's favourite diet, the CSIRO Total Wellbeing Diet.

Total Wellbeing Diet (TWD) weight loss results

21.0%

Average body weight lost by TWD's 'super stars' who are the program's most successful members.

7.3%

Average body weight lost by members who stay on the program for 12 weeks and use the TWD digital tools the most.

7.2%

Average body weight lost by all members who stay on the TWD 12 Week Program.

9%

Average body weight lost after 6 months by members who stay on the program and then maintain their success for the remainder of the year.

3X More weight loss

Members who stay on the TWD 12 Week Program lose 3 times as much weight as those who start by don't stay through to the end.

Secrets of 'super stars'

The most successful members, who on average lost 21% of their body weight, used the TWD digital tools almost 4 times more than those who only lost a small amount of weight.

The first DAYS
21 MATTER
MOST

Members who use the TWD digital tools very actively in the first 21 days of the program lose twice as much weight as those who are least active.

For members who stay on the 12 Week Program, the Total Wellbeing Diet achieves clinically significant weight loss across a wide range of demographics

CSIRO Total Wellbeing Diet Today

Australia’s #1 diet with clinically significant results in a real-world setting.

Key outcomes^

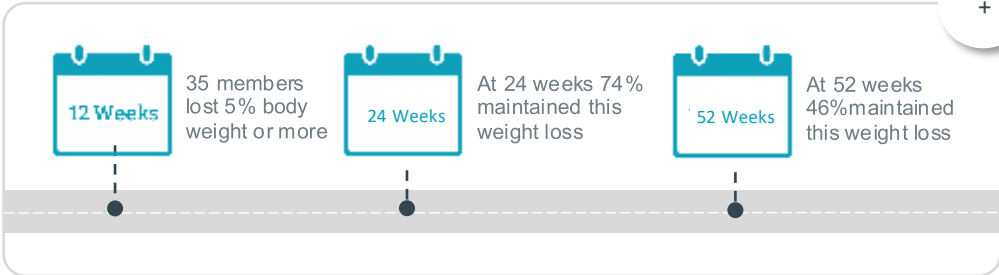

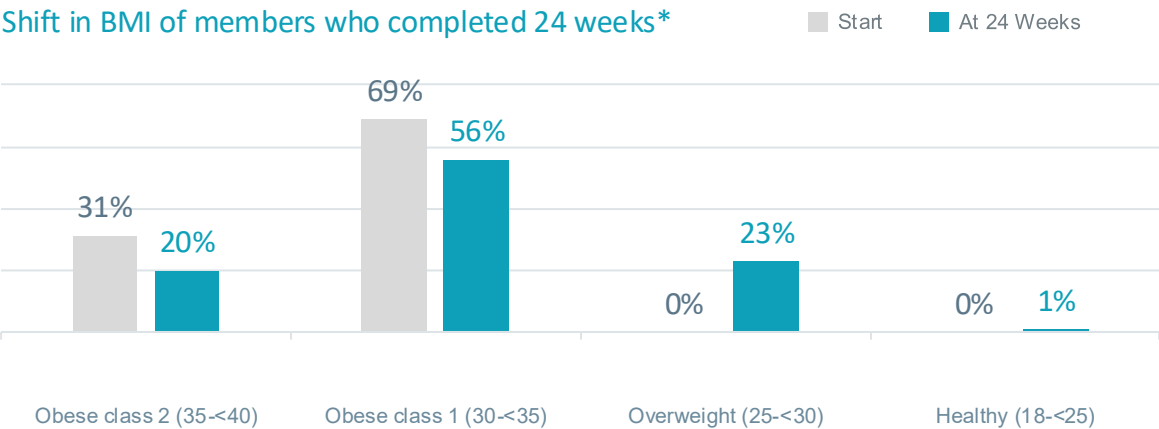

- ✓ Proven long-term weight loss results: The program delivered an average weight loss of 5.9 kg at 12 weeks and 5.5 kg at 12 months in a study of over 24,000 members.,
- ✓ Clinically significant weight loss: More than half (52.3%) of members achieved at least a 5% reduction in body weight at 12 months.
- ✓ Sustained engagement drives success: Higher platform interaction was linked to greater weight loss, with members who logged in more frequently seeing better results.
- ✓ Real-world application: Unlike many clinical trials, this study evaluated real-world commercial weight loss success.

“The Total Wellbeing Diet is one of CSIRO’s major success stories and demonstrates our commitment to working to reverse the high rates of obesity within the next 10 years, as called for in the National Obesity Strategy.”

Professor Brett Sutton, Director, CSIRO Health and Biosecurity

Outcomes based on program type

A 5% reduction in body weight, as observed in the CSIRO Total Wellbeing Diet program, is clinically significant. This 5% threshold has been proven to provide tangible improvements in overall health, demonstrating the importance of even modest weight reduction in chronic disease management, particularly in the case of high blood pressure, Type 2 diabetes, and high cholesterol, it is enough to reduce the need for medication in several chronic conditions, leading to both health and financial benefits for individuals, improving long-term health outcomes.

Weight loss % by program type (CDMP)~

Body weight loss’s impact on health conditions (TWD)^

High Blood Pressure

Among those who lost more than 5%, 77% reported an improvement in their blood pressure compared to 29% of those with minimal weight loss. 56% of respondents attributed a reduction in their blood pressure medication to the Total Wellbeing Diet Online program.

High Cholesterol

51% of respondents with high cholesterol reported improvement in their condition. This figure increased significantly for those who lost the most weight. Moreover, many respondents reported a reduction or cessation of cholesterol-related medication, contributing to both health improvements and cost savings.

Joint Pain

Arthritis was one of the most reported health conditions among members (41%). Some respondents were able to reduce or stop arthritis-related medication, with reported savings of approximately \$18 per month. These findings suggest improvements in joint pain and mobility may be a key benefit of weight loss through the program.

Type 2 Diabetes

those who lost 5% or more reported substantial improvements in Type 2 diabetes. Among the highest weight loss group, 81% felt their diabetes had improved. Additionally, 55% of those with Type 2 diabetes reduced or stopped their medication after starting the program, leading to average savings of \$18 per month.

Weight Loss Patterns and Outcomes Over 12 Months on the CSIRO Total Wellbeing Diet: CSIRO Evaluation Study

Abstract

Background: A greater understanding of the effectiveness of digital self-management programs and their ability to support longer-term weight loss is needed.

Objective: This study aimed to explore the total weight loss and patterns of weight loss of CSIRO (Commonwealth Scientific and Industrial Research Organisation) Total Wellbeing Diet Online members during their first 12 months of membership and examine the patterns of platform use associated with greater weight loss.

Methods: Participants were Australian adults who joined the program between October 2014 and June 2022 and were classified as longer-term members, meaning they completed at least 12 weeks of the program, had baseline and 12-week weight data, and had a paid membership of ≥1 year (N=24,035). Weight loss and percentage of starting body weight loss were calculated at 3, 6, 9, and 12 months using 3 statistical approaches: (1) multiple imputations method, (2) all available data, and (3) complete data only. Among members with complete data (6602/24,035, 27.5%), patterns of weight loss and gain were examined, and how this related to total weight loss and platform use was explored.

Results: Members were mostly female (19,972/24,035, 83.09%), aged 31 to 50 years (9986/24,035, 41.5%) or 51 to 70 years (12,033/24,035, 50.06%), and most members were classified as overweight or obese (23,050/24,035, 95.9%). Using multiple imputations, the average estimated weight loss was 5.9 (SE 0.0245) kg at 12 weeks, 6.7 (SE 0.0348) kg at 6 months, 6.2 (SE 0.0400) kg at 9 months, and 5.5 (SE 0.0421) kg at 12 months. At 12 months, more than half the members (12,573/24,035, 52.3%) were at least 5% below their starting body weight and 1 in 4 (5865/24,035, 24.4%) were at least 10% below their starting body weight. In the subsample with complete data, the average weight loss at 12 months was 7.8 kg. The most common (961/6602, 14.56% members) weight loss pattern over the first 12 months was 6 months of weight loss, followed by 6 months of weight maintenance. This group had an average weight loss of 10.6 kg at 12 months (11.9% of their starting body weight). In a subgroup of participants who consistently lost weight over the 12-month period (284/6602, 4.3% of the sample), weight loss reached up to 22.3 kg (21.7% of their starting body weight). Weekly platform use was positively associated with total weight loss ($r=0.287$; $P<.001$). Members who used the platform >30 times per week (approximately >4 times/d) were more likely to lose weight in the first 6 months of the program.

Conclusions: This commercial weight loss program was shown to be effective, with 1 in 2 members achieving clinically significant results after 1 year. Greater engagement with the platform was associated with consecutive periods of weight loss and greater weight loss success overall.

Body weight loss’s impact on health conditions (TWD)^

High Blood Pressure

Among those who lost more than 5%, 77% reported an improvement in their blood pressure compared to 29% of those with minimal weight loss. 56% of respondents attributed a reduction in their blood pressure medication to the Total Wellbeing Diet Online program.

High Cholesterol

51% of respondents with high cholesterol reported improvement in their condition. This figure increased significantly for those who lost the most weight. Moreover, many respondents reported a reduction or cessation of cholesterol-related medication, contributing to both health improvements and cost savings.

Joint Pain

Arthritis was one of the most reported health conditions among members (41%). Some respondents were able to reduce or stop arthritis-related medication, with reported savings of approximately \$18 per month. These findings suggest improvements in joint pain and mobility may be a key benefit of weight loss through the program.

Type 2 Diabetes

those who lost 5% or more reported substantial improvements in Type 2 diabetes. Among the highest weight loss group, 81% felt their diabetes had improved. Additionally, 55% of those with Type 2 diabetes reduced or stopped their medication after starting the program, leading to average savings of \$18 per month.

Results beyond the weight loss

Building sustainable habits through education and engagement.

Education

Building Confidence Through Knowledge¹:
Educational content empowered members to make healthier choices, boosting confidence in managing overall wellbeing.

Mindset for Lifelong Habits²:
Behavioural tools encouraged a shift toward sustainable habits, focusing on long-term health and happiness.

Mindfulness and Control³:
Insights on emotional eating and mindfulness helped members develop a healthier relationship with food.

Engagement

Increased Positivity and Motivation⁴:
Those who engaged with tools like reported feeling more positive and motivated, making their health journey enjoyable.

Sense of Community⁵:
Forums and community features provided connection and support, reducing isolation and enhancing member satisfaction.

Improved Emotional Wellbeing²:
Tracking progress through the food diary and weight tracker gave members a sense of control and boosted emotional wellbeing.

Retention

Sustained Lifestyle Improvements¹:
Members completing the program reported better energy and mental clarity, fostering long-term healthy habits.

Quality of Life Enhancements⁶:
Long-term participants noted better sleep, reduced stress, and increased confidence in managing their health.

Personalised Support for Retention⁷:
Personalised meal plans and reminders helped members feel empowered and supported throughout their journey.

Support for those outside CDMP eligibility~

A proactive approach to better health and early intervention

Not every member may qualify for a Chronic Disease Management Program (CDMP), but the need for health support doesn't stop there. That's why we offer non-CDMP options tailored to members who are seeking early intervention or risk management solutions. These programs provide accessible, preventative support designed to empower individuals. By addressing health challenges upstream, we ensure every member has access to resources that promote long-term well-being, regardless of their current health status.

A suite of digital health programs for all stages of health

Using the CSIRO Total Wellbeing Diet science and fundamentals and assessments, as the foundation of all our programs to aid in the battle against the progression of disease, from the stages of poor lifestyle through to the progression of disease.

Our Health Insurance Product Suite

Chronic Disease Management Programs

Total Wellbeing Lifestyle Plan

A 16–24 week fully funded program through hospital cover, designed to support members with chronic conditions through:

- ✓ CSIRO Total Wellbeing Diet digital and scientifically formulated program
- ✓ Health Care Assessment with an Registered Nurse
- ✓ 9 – 15 Health Coaching Sessions with an Accredited Practising Dietitian
- ✓ Accredited patient management & cohort reporting
- ✓ Support for GPL1 medications
- ✓ Tailored content for chronic conditions

Delivers clinically proven weight loss & health improvements.

Primary Prevention Programs

Identifying at risk members

A 12–16 week fully funded program through hospital cover, designed to support members at risk of chronic disease through:

- ✓ CSIRO Total Wellbeing Diet digital and scientifically formulated program
- ✓ 3–4 one-on-one health coaching sessions
- ✓ Educational guides for lifestyle & risk factors
- ✓ Early intervention to prevent hospitalisation & complex claims

A proactive, cost-effective solution to improve health and reduce long-term claims.

Extra's packages

Offering additional support

A flexible, claimable health coaching program designed for members who want extra support:

- ✓ CSIRO Total Wellbeing Diet digital and scientifically formulated program
- ✓ Flexible packaged options to suit your extras product range
- ✓ Ideal for members starting, continuing, or needing extra guidance
- ✓ Cost-effective for the fund and member & claimable via extras cover
- ✓ Ongoing support after CDMP or Prevention Programs

A simple way for members to invest in their long-term health and get extra value from their health cover.

Member Benefit Discounts

Always on value for your members

A permanent discount on the CSIRO Total Wellbeing Diet, providing added value to members:

- ✓ CSIRO Total Wellbeing Diet digital and scientifically formulated program
- ✓ Savings available year-round
- ✓ Special Marketing Discount option—always better than or equal to public offers
- ✓ A seamless way to encourage sustainable health improvements
- ✓ Enhances member benefits with no additional cost to the fund

A valuable, effortless way to support members in achieving their health goals.

Past partner webinar results

Educational webinars delivered in partnership with trusted experts create a powerful entry point into behaviour change. Across our health fund collaborations, sessions on nutrition and metabolic health not only drive strong attendance and engagement, but translate into meaningful enrolments into the CSIRO Total Wellbeing Diet — demonstrating their value as a scalable lead generation channel.

What their members are saying:

“Very engaging”

“Thank you for a fabulous webinar – very pertinent to so many women, myself included. Please do more of these! xx”

“Excellent to support evidence-based practice and translating that for broad population.”

“The right tone was struck – it was a professional webinar, but also struck the right tone – presenters were relatable and knowledgeable. Loved that the presenters didn’t talk down to the audience – medical information imparted as facts, love it.”

“I’m fairly new to this fund, and having had nothing like this from my previous health

insurance provider (and having been there for over 20 years!) I’m impressed with the consideration given to this cohort of female customers, and the offer for the CSIRO diet as a long-term preventative way to improve people’s health :)”

“I enjoyed seeing strong intelligent women having a conversation and sharing information.”

“I really enjoyed the content, delivered at the right level for me. Some great information shared.”

“Thank you for a fabulous webinar - very pertinent to so many women, myself included. Please do more of these! Xx”

Our Triage / Member Journey

Helping you to provide evidence based chronic disease management programs

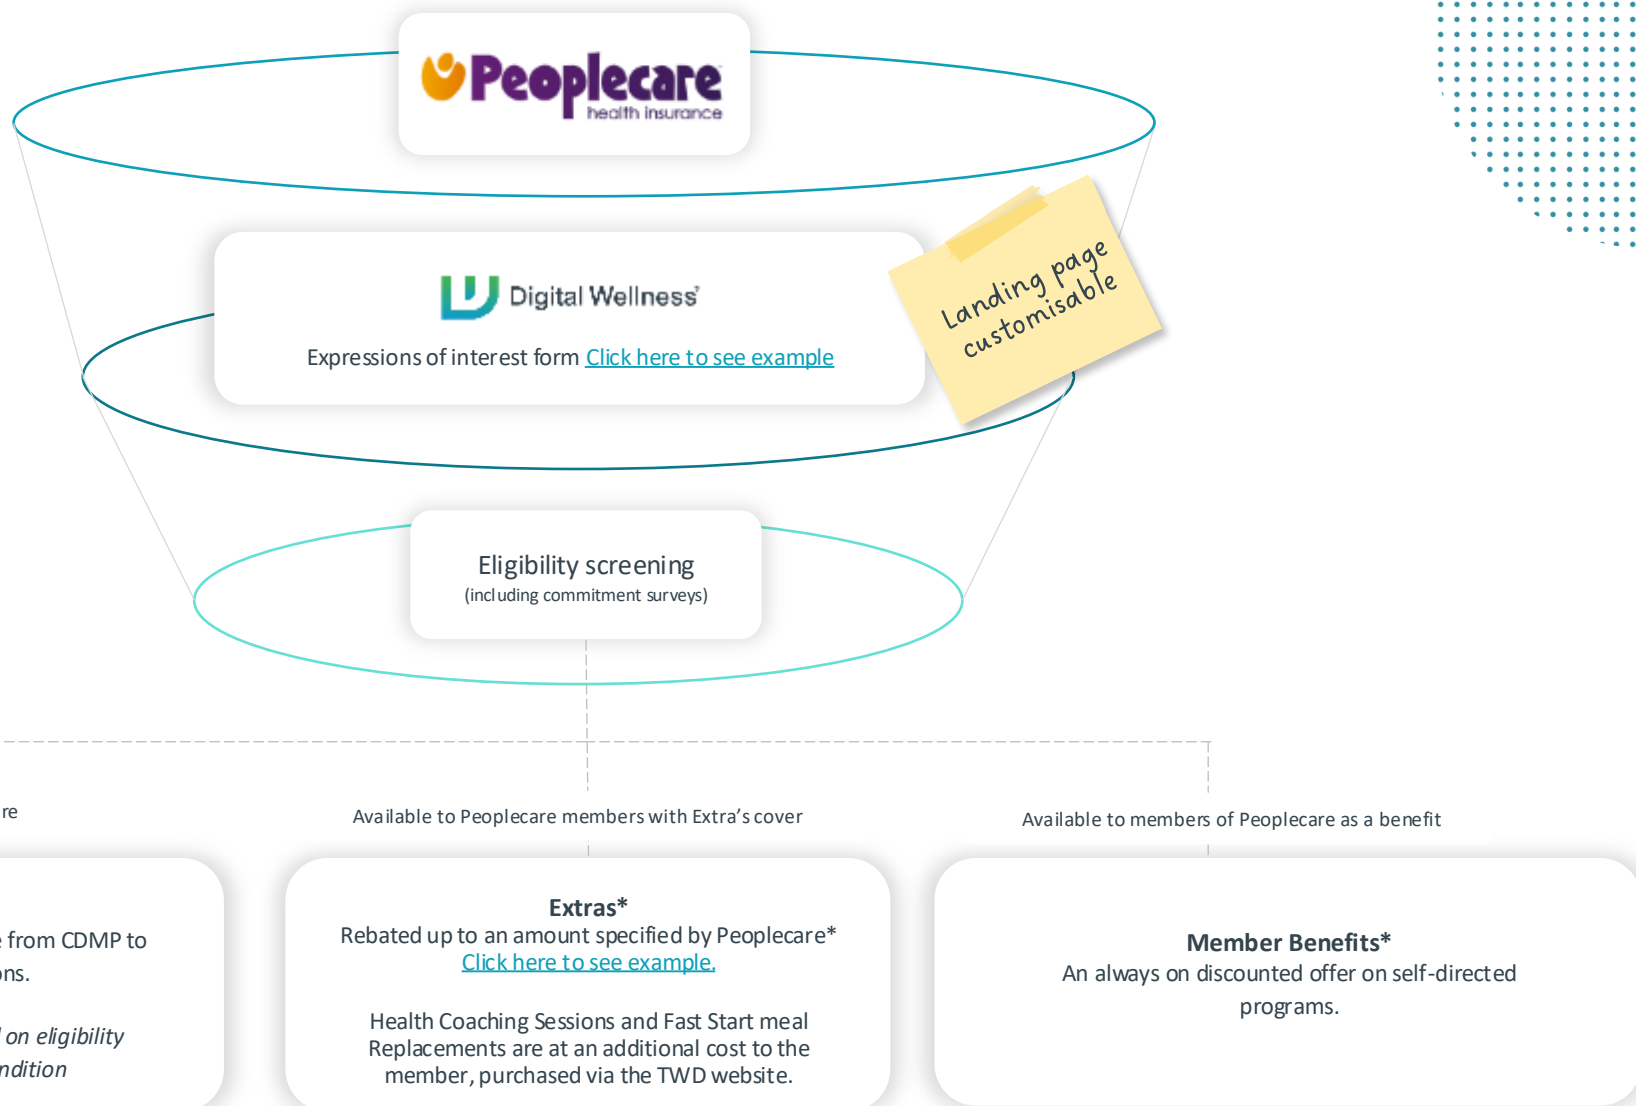

SA Gov – Referral Pathway

The brief

To launch a comprehensive digital program focused on weight loss and overall wellbeing. This program will offer members a complete pathway, from risk prevention to disease management.

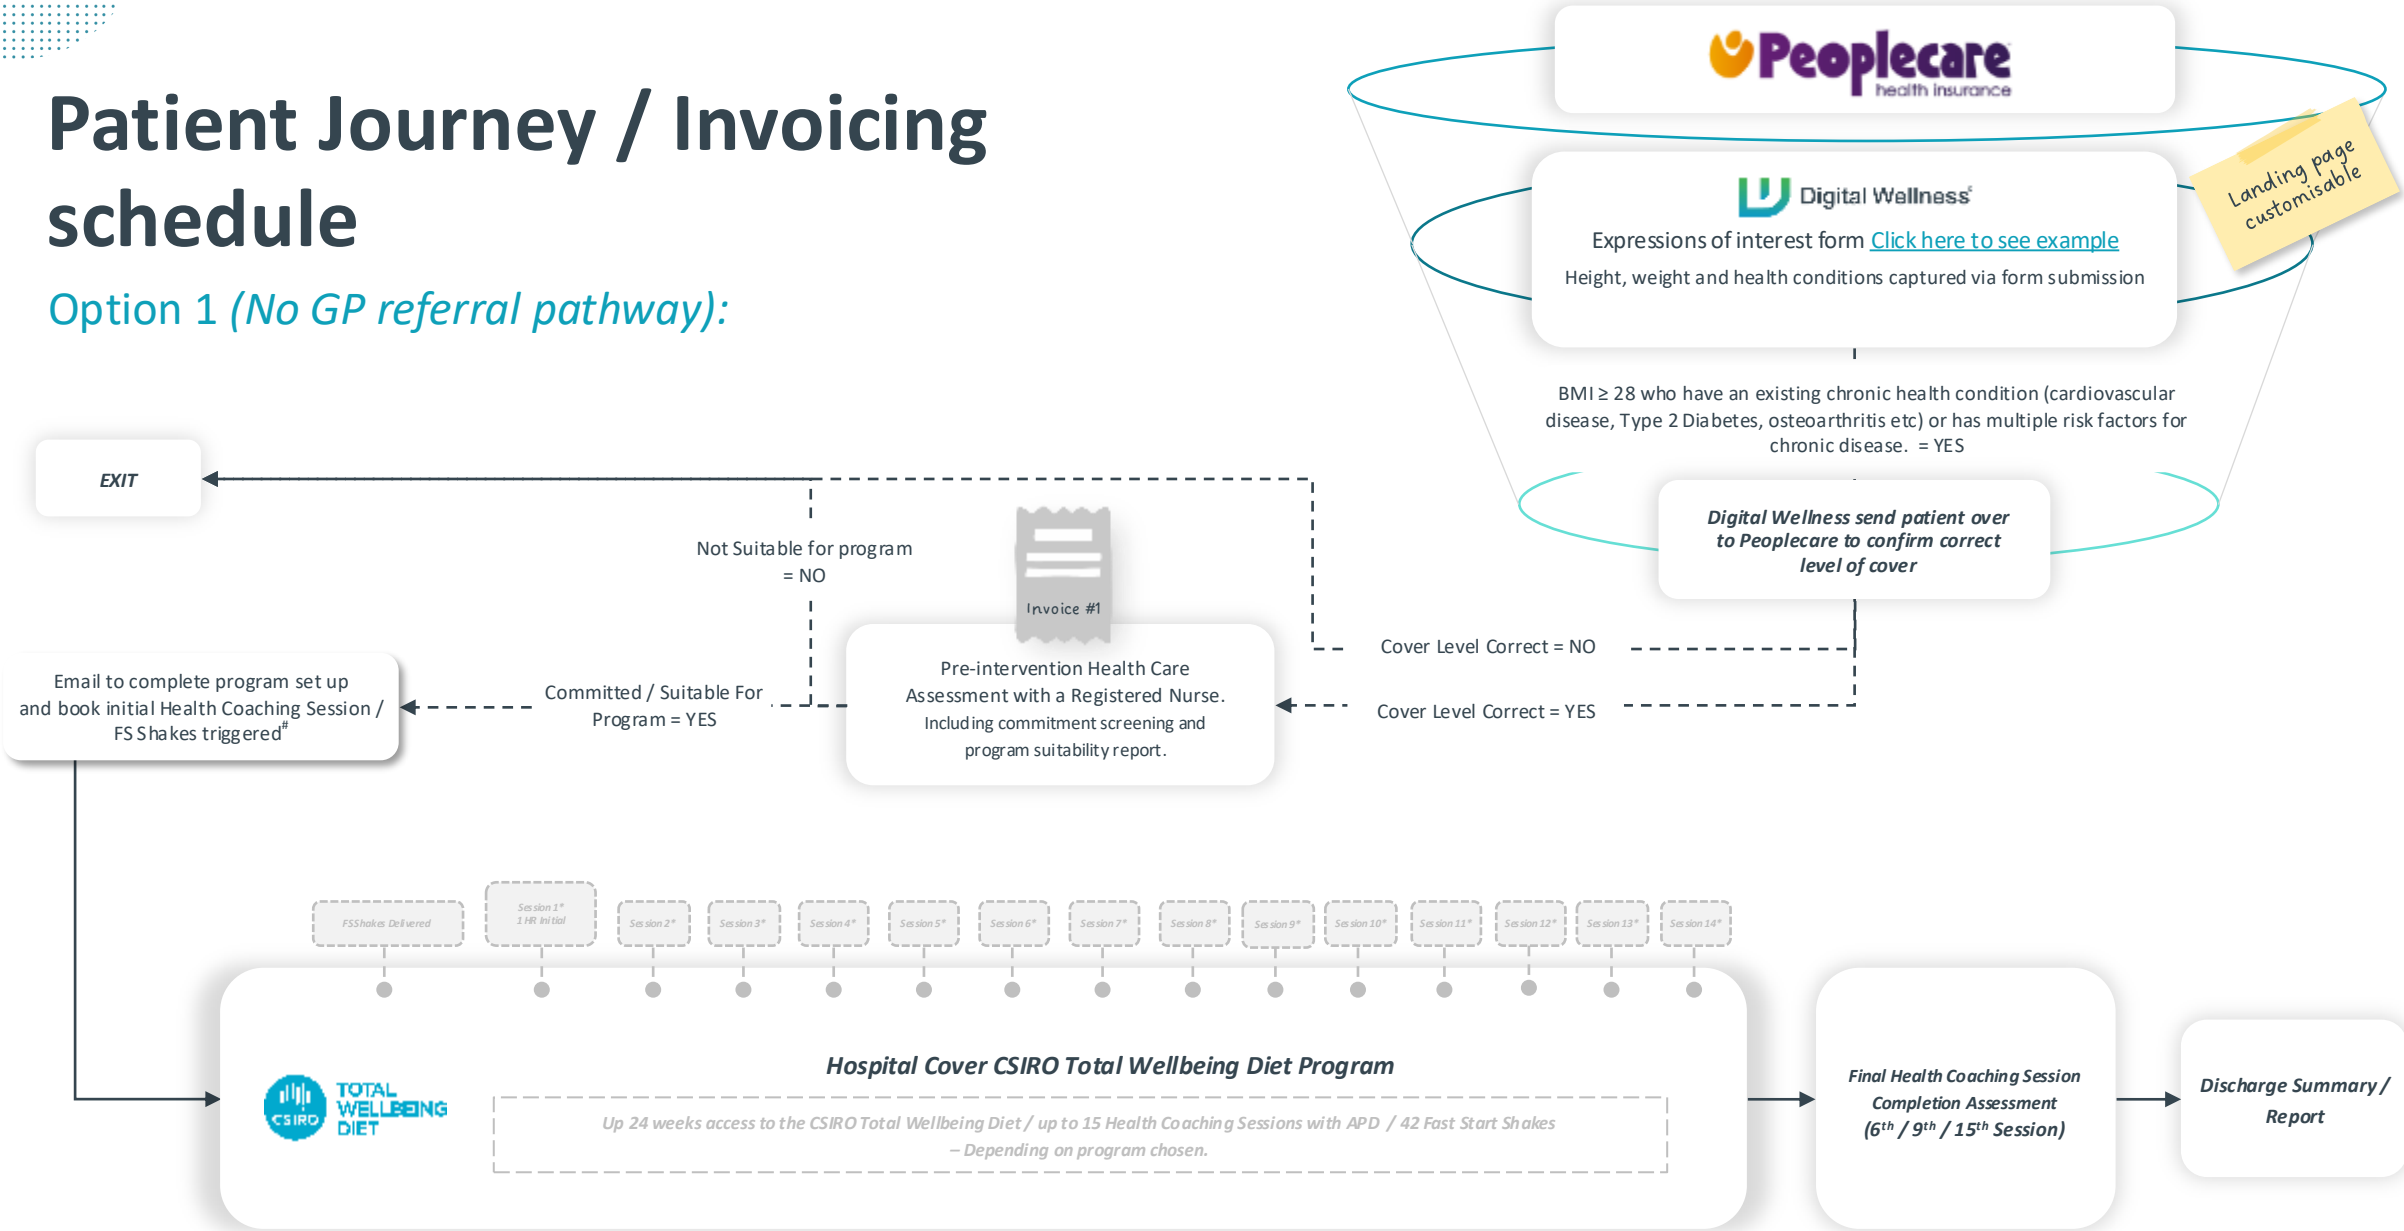

Additionally, it will include the ability to assess risk during patient onboarding, ensuring each member is triaged to the most suitable program for their needs.

Hospital Cover options allow for bespoke programs. i.e. Nurse Assessments, Health Coaching Sessions, Cohort Reporting, etc.

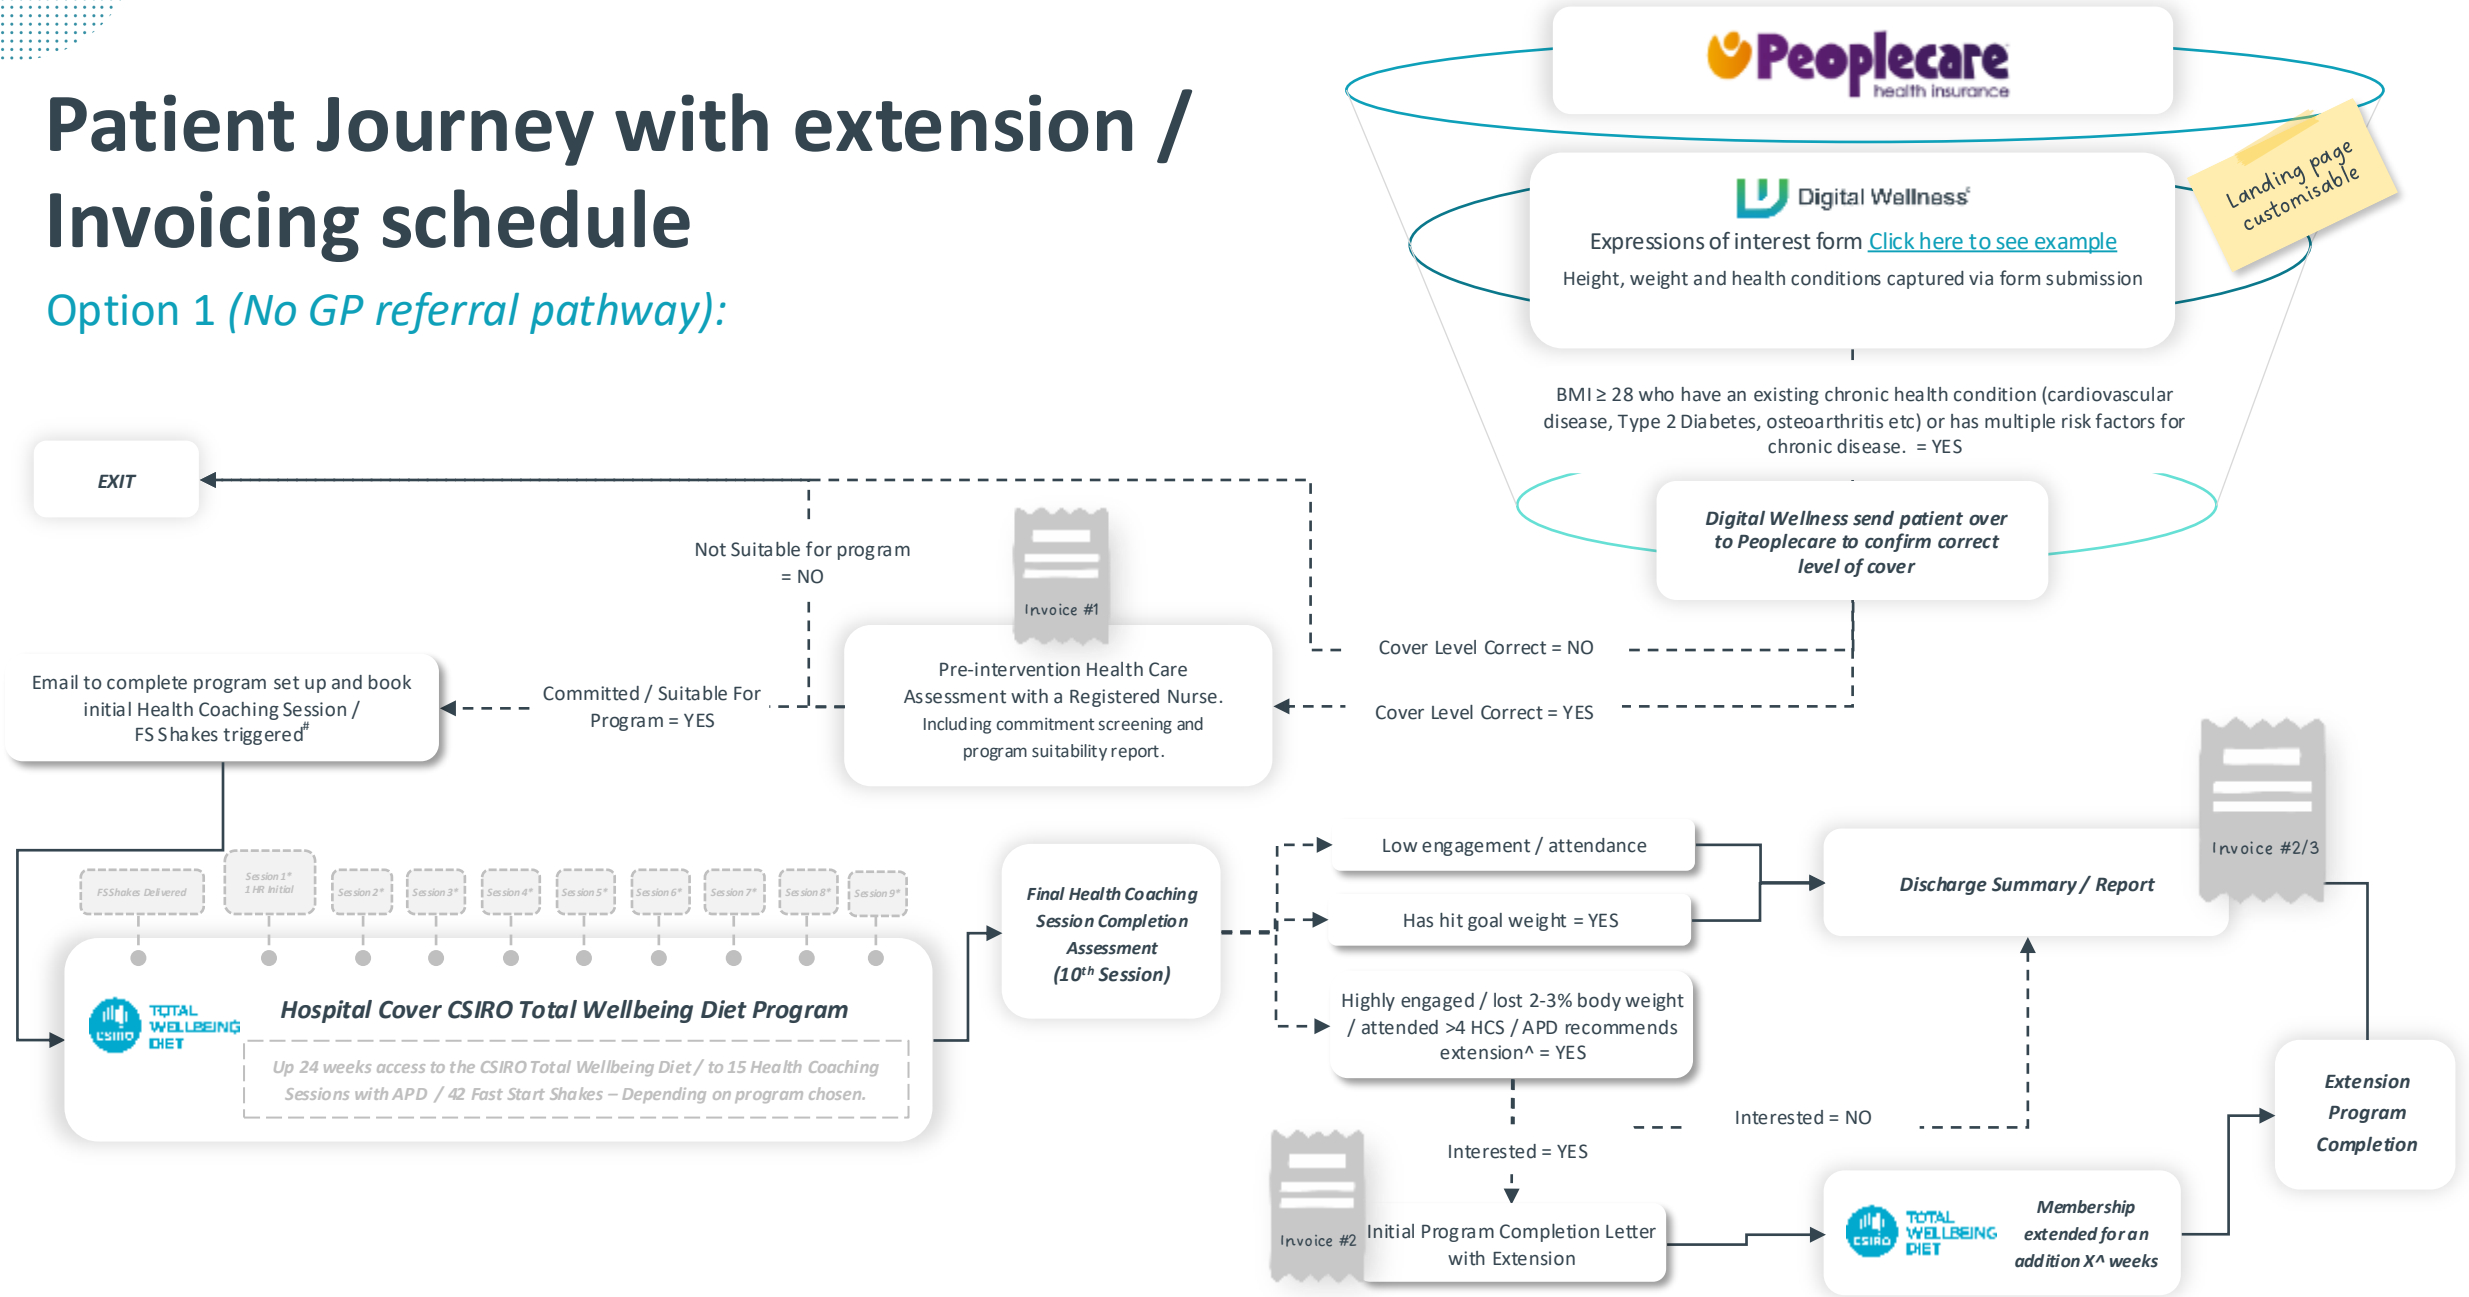

Patient Journey / Invoicing schedule

Option 1 (No GP referral pathway):

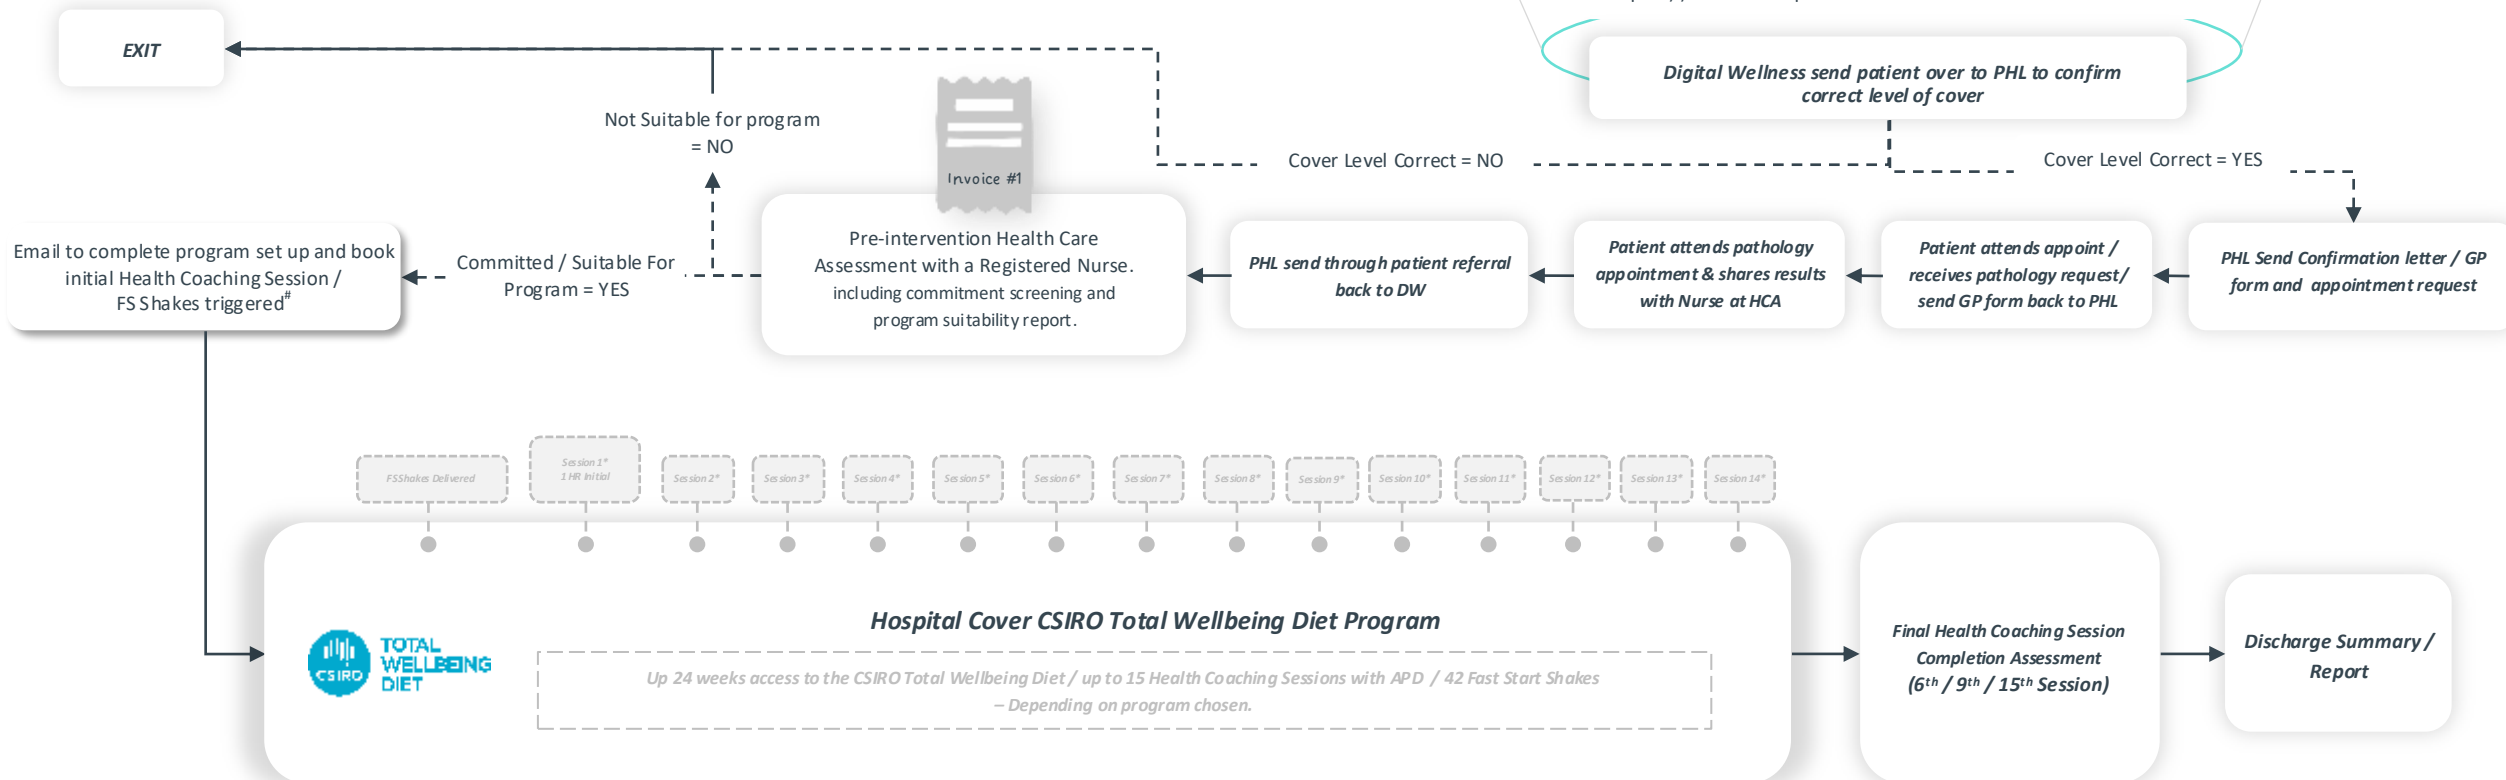

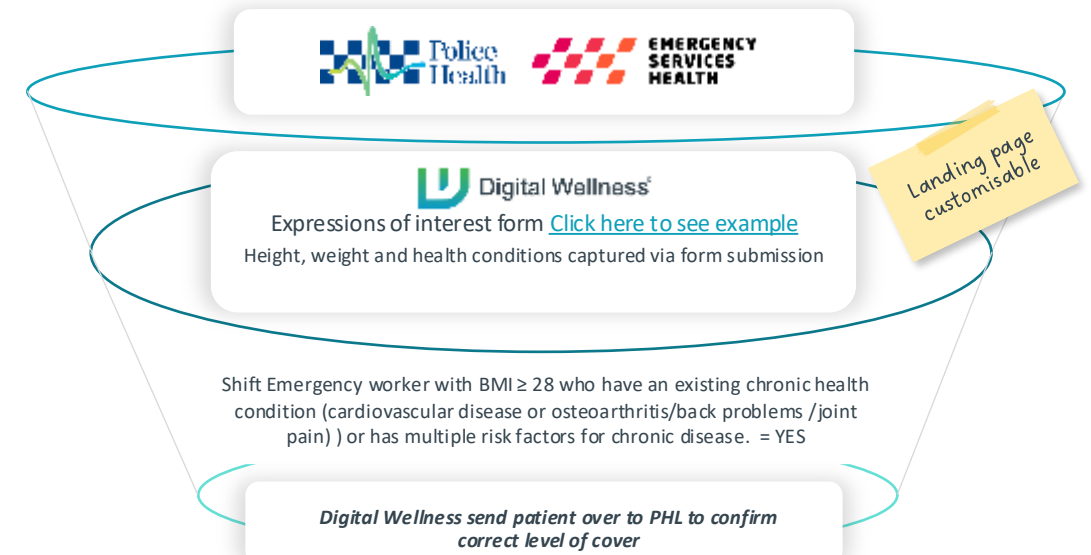

Patient Journey with extension / Invoicing schedule

Employer Funded Programs

A thriving workforce isn't just good for employees—it's great for business.

A healthier, more engaged workforce that delivers measurable results:

✓ Increased output ✓ Lower costs ✓ Higher employee satisfaction and retention

Step 1:

- Choose your program
- Select your add ons
- Set start & close date
- Determine a code limit

Step 2:

- Receive your bespoke code from your dedicated account manager

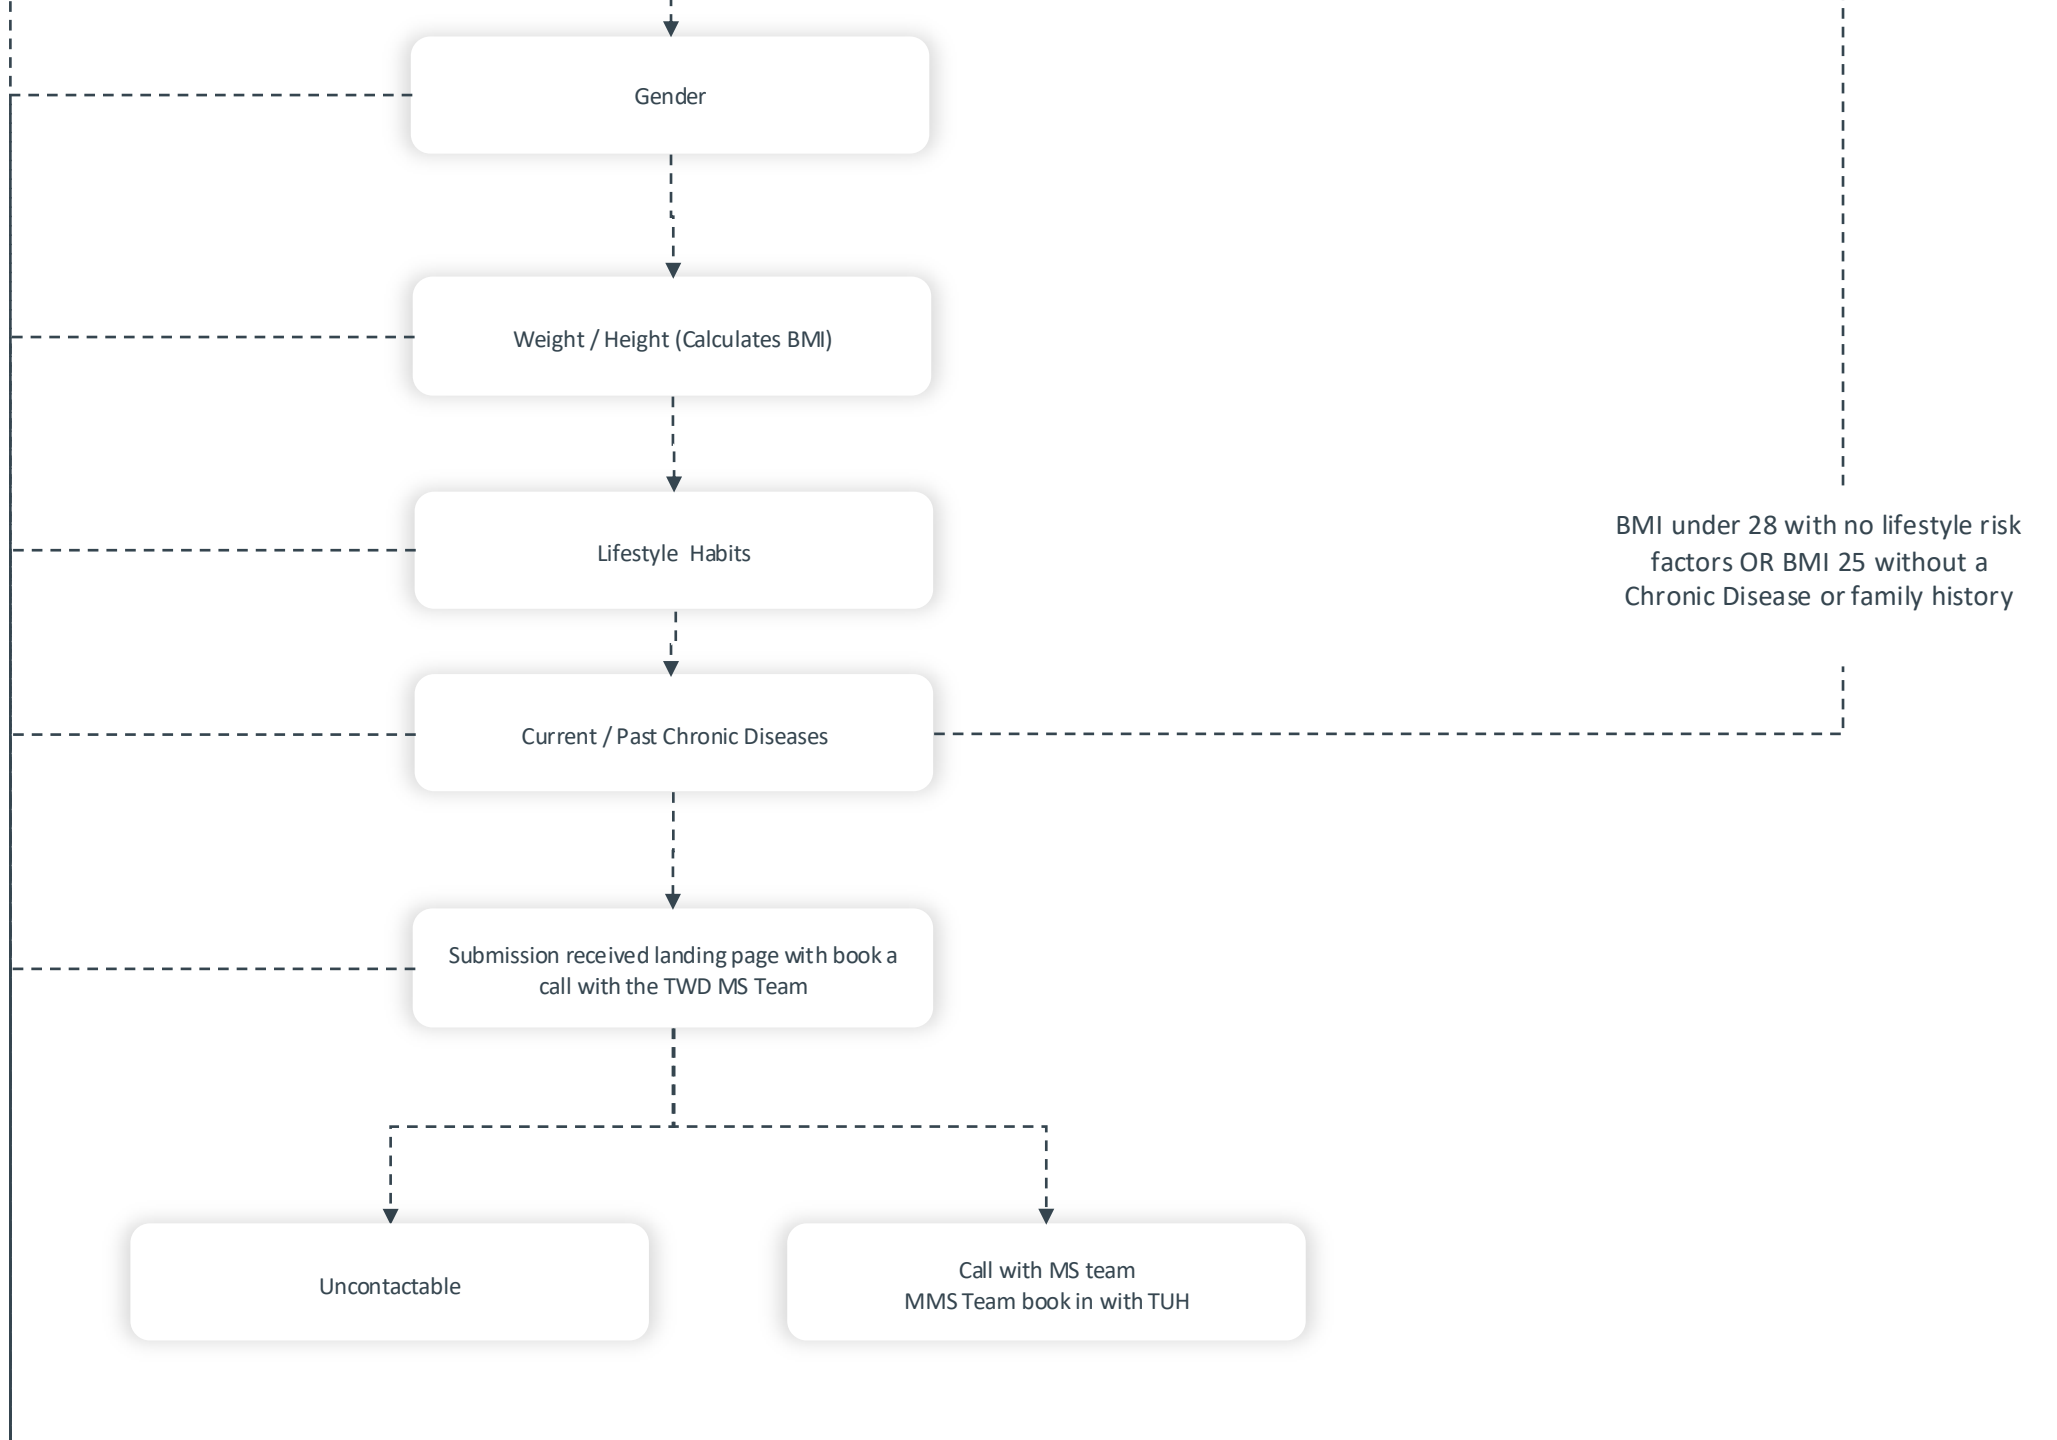

Step 3:

- Promote the code out to your employees and launch your program.

Step 4:

- Receive your cohort report review insights
- rebook your next program

Recommended Next Steps

Place holder content

Stage 1 –Solution Development

Co-design the world's first wraparound, patient-centred obesity care model combining Monjaro with the CSIRO Total Wellbeing Diet.

Key Actions:

- ✓ Jointly develop the integrated program structure (medication + behaviour change + digital support)
- ✓ Map the patient journey to align with Lilly's Seek, Start, Stay framework
- ✓ Build GP, pharmacy, and patient-facing assets (consult packs, handouts, digital onboarding flows)
- ✓ Ensure compliance with TGA regulations by leading with lifestyle and health outcomes messaging

Stage 2 – Partnership Launch

Launch the co-branded solution nationally as a category-defining model for obesity management.

Key Actions:

- ✓ Awareness campaigns (PR, earned media, ATL disease awareness, digital/social) to build national visibility
- ✓ Co-branded digital destination and enrolment pathway
- ✓ GP and pharmacy engagement to reduce prescribing friction and increase confidence
- ✓ Direct-to-patient activation through education, webinars, email/SMS onboarding, and app support

Stage 3 – Growth & Scale

Expand reach and impact across health funds, government, and broader healthcare networks.

Key Actions:

- ✓ Use real-world outcomes data (adherence, weight loss, biometric health improvements) to strengthen PHI and policy engagement
- ✓ Develop strategic co-delivery models to align with PHI integrated care visions
- ✓ Leverage member stories, referral programs, and ambassadors to fuel advocacy
- ✓ Position Lilly × CSIRO × Digital Wellness as the global benchmark for obesity care

Engaging Openers

When engaging with customers, consider questions like:

“Have you tried weight loss programs before? What worked or didn’t work for you?”

“Are you looking for a program that combines shakes with healthy eating guidance?”

“Would you like to access a CSIRO-backed online program for structure and accountability?”

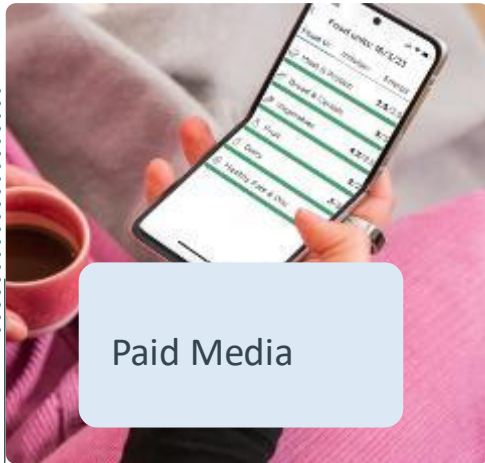

Filter - Legalities
TGAC compliance

Images need
updating

Channel Strategy

Our go-to-market strategy uses five clear channels — paid, owned and earned healthcare and direct member communications — mapped to the Seek, Start, Stay framework. This ensures compliant awareness, seamless initiation, and sustained patient engagement, optimised for scale and persistence.

“Global behemoth partners with CSIRO to deliver Total Wellbeing”

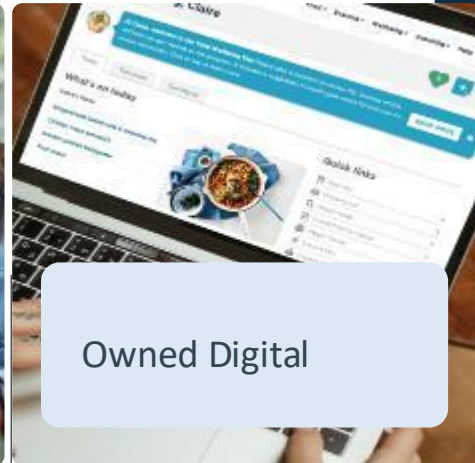

Paid Media

- ATL: TV, radio, OOH
- Performance: Search, paid social

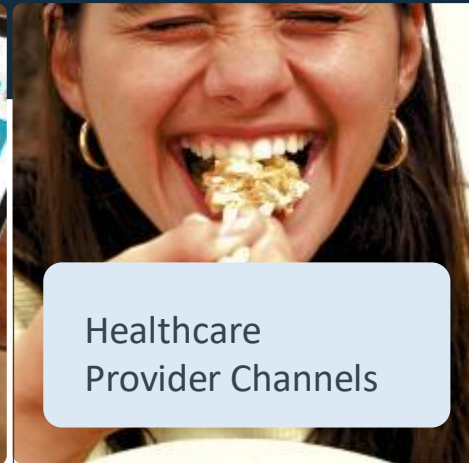

Earned Media & Partnerships

- ATL: TV, radio, OOH
- Performance: digital ads, search, paid social
- PR campaigns leveraging CSIRO research studies of existing and new member cohorts

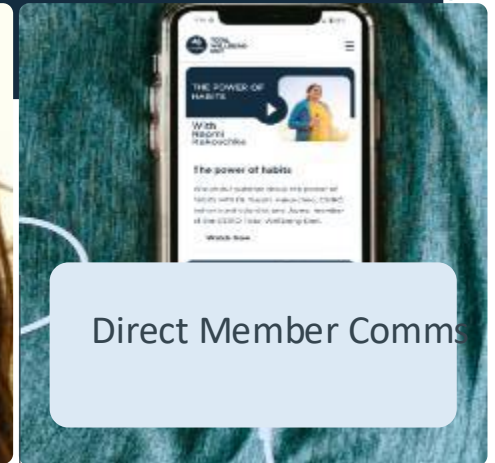

Owned Digital

- Co-branded landing pages
- Organic social
- Downloadable guides & webinars
- Email journeys

Healthcare Provider Channels

- GP consult packs & patient materials
- Pharmacy handouts
- GP check-ins & follow-ups

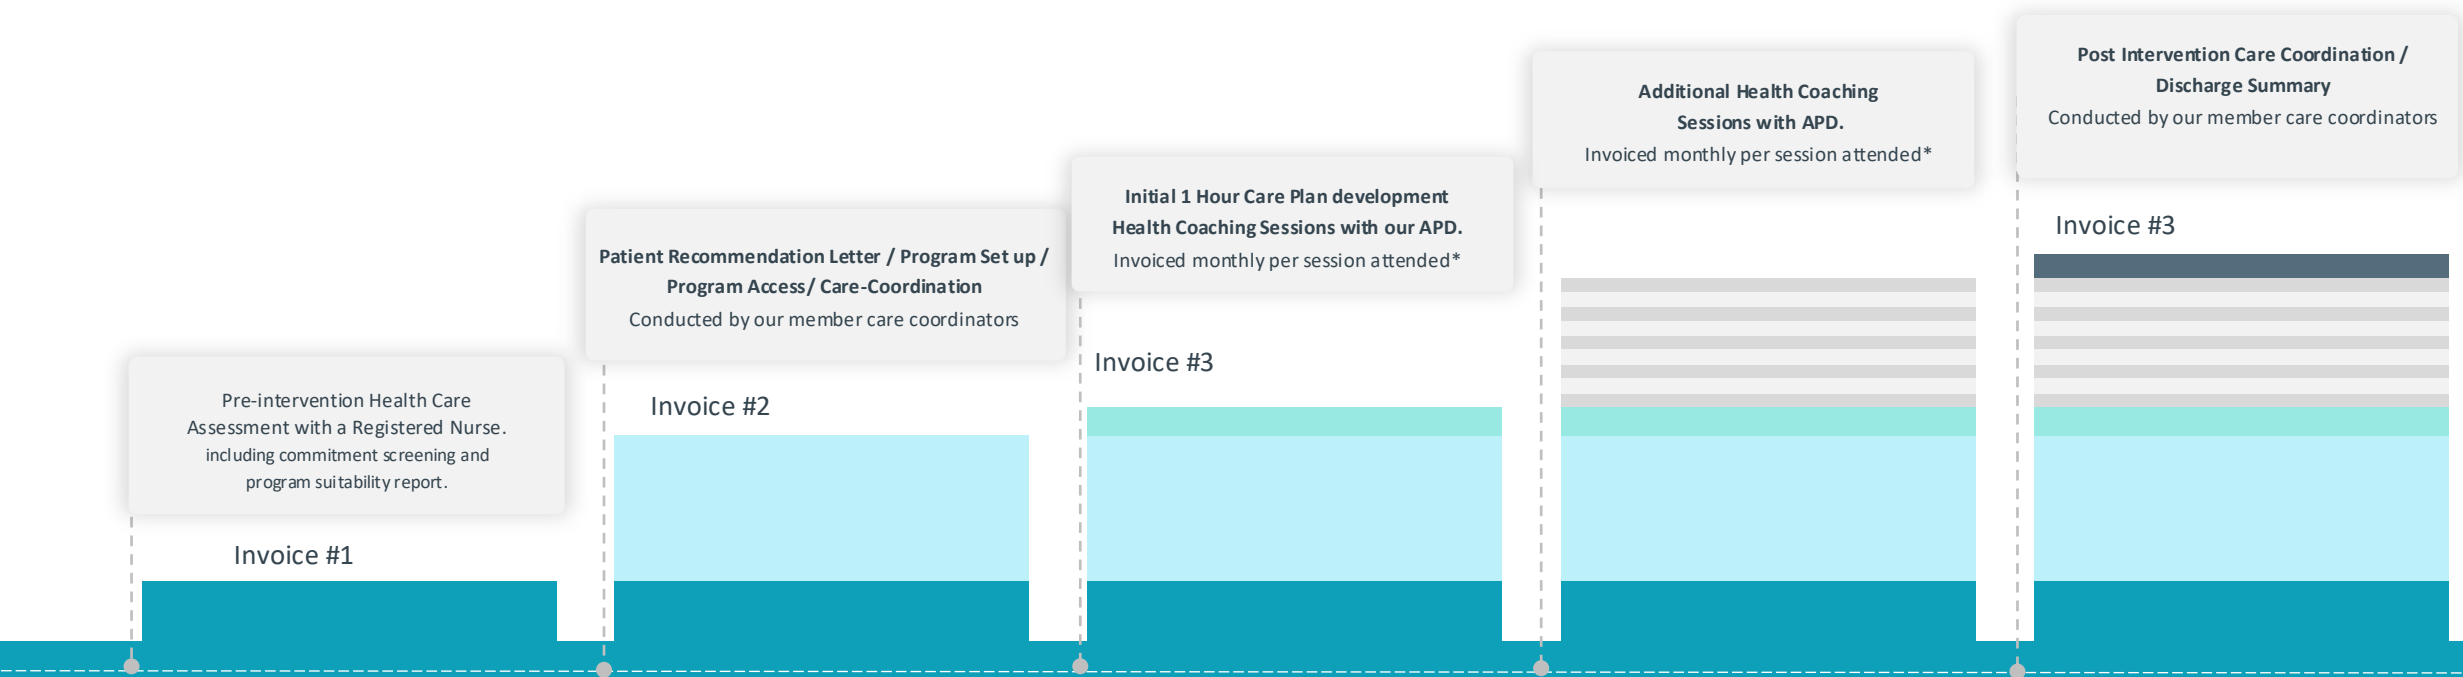

Direct Member Comms

- Personalised email journeys & newsletters
- SMS reminders, nudges, onboarding texts
- Mobile app, Coaching sessions & member community
- Referral programs

Example Invoicing Schedule CDMP – *Non packaged*

This invoicing schedule outlines the cost per invoice as a member progresses through the stages of the program. Additionally, we have incorporated a scaling discount structure on the *fixed costs*, rewarding higher volumes of registrations with greater savings. This approach ensures flexibility and value, supporting efficient budgeting as participation increases.

Health Coaching Sessions

Coaching support that drives employee wellbeing and sustainable results

Supporting employees to improve their health is one of the most effective ways to lift productivity, reduce absenteeism and strengthen overall workforce wellbeing.

Our Total Wellbeing Health Coaches are Accredited Practising Dietitians and members of Dietitians Australia. They understand the CSIRO Total Wellbeing Diet in depth and provide evidence-based support across nutrition, behaviour change and lifestyle planning. Their role is to help employees set realistic goals, stay accountable, and build long-term healthy habits that translate into meaningful health improvements..

What employees can expect from a coaching session

Each online session is tailored to the individual, offering:

- ✓ Personalised weight-loss and nutrition advice
- ✓ Progress review and recommendations to improve outcomes
- ✓ Guidance on getting the most from the CSIRO Total Wellbeing Diet platform
- ✓ Answers to program and meal-plan questions
- ✓ Motivation, accountability and practical strategies to stay on track
- ✓ Support for overcoming challenges and developing sustainable habits

Group Coaching Webinars: Tailored support for shift workers & first responders

Our Group Coaching Webinars provide expert advice tailored to emergency responders and shift workers, helping them stay healthy despite demanding schedules.

Expert-Led Sessions:

Conducted by CSIRO Total Wellbeing Diet experts and Accredited Practising Dietitians (APDs), with tips on using Fast Start Shakes to replace meals during busy shifts.

Shift-Friendly Scheduling:

Live Zoom sessions fit irregular routines, and recordings are available for flexibility.

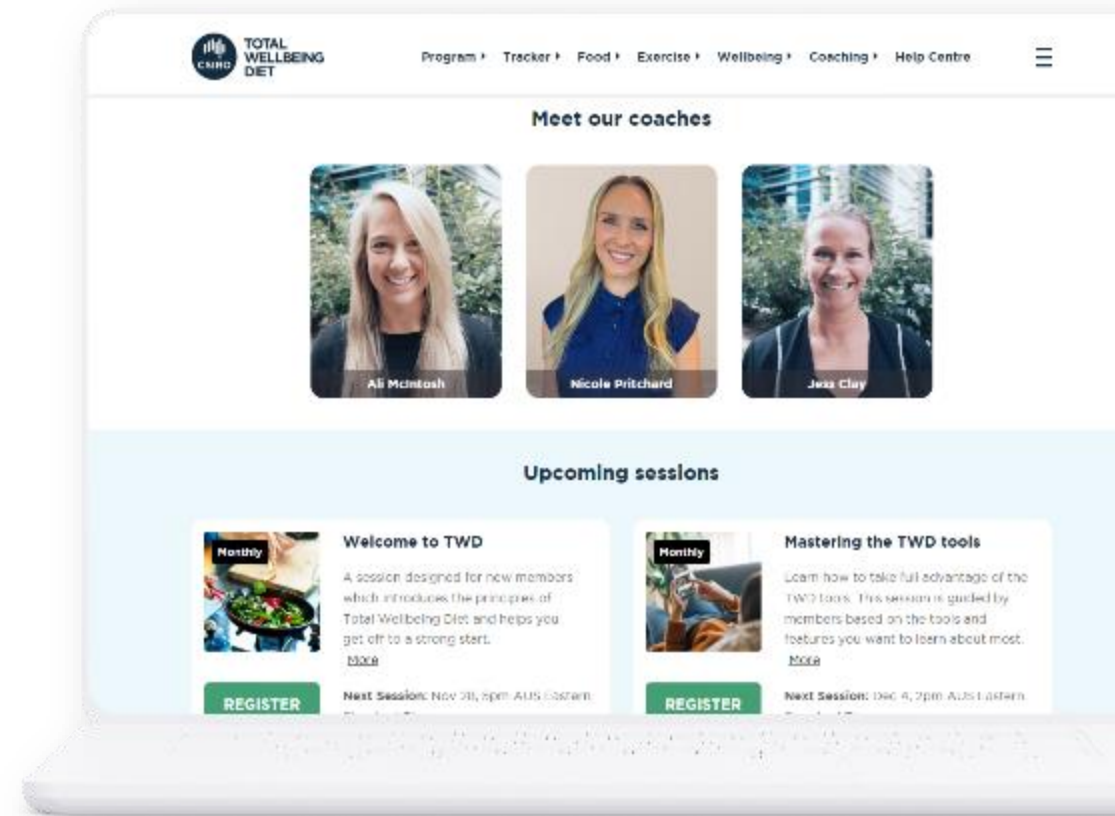

Real-Time Support:

Interactive Q&A ensures participants get personalised advice on meal planning, managing cravings, and healthy snacking.

Seamless Integration:

Learn how to transition from Fast Start Shakes to whole foods, creating sustainable, long-term eating habits.

These webinars ensure that emergency responders have the tools and flexibility to manage their health goals efficiently, no matter how unpredictable their schedules.

Helping you engage members

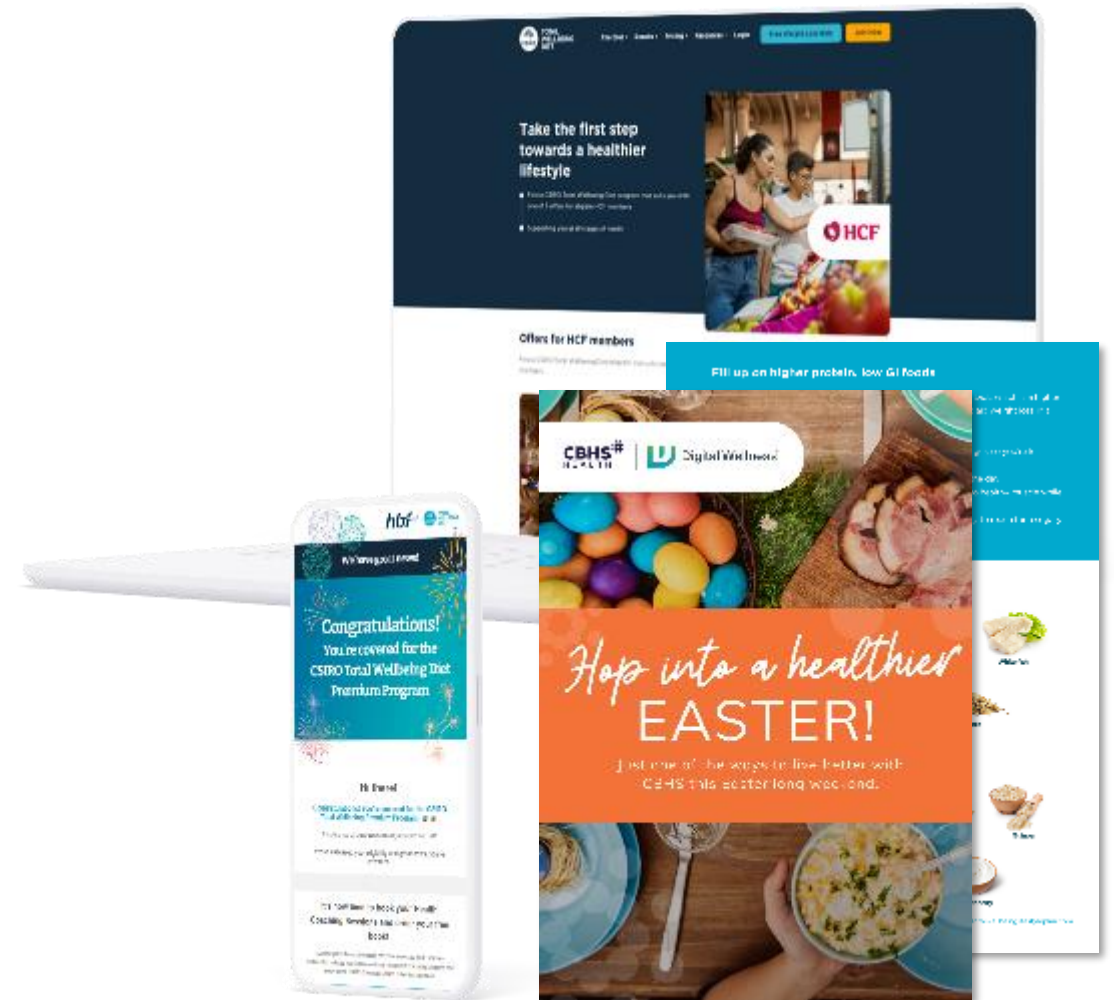

Developing marketing resources with you

Partner with us to elevate your engagement strategy and drive meaningful connections with your audience.

We seamlessly collaborate with your marketing team to identify and enroll the ideal participants for targeted programs, commencing with a meticulous marketing approach.

Whether it's crafting captivating email series, dynamic social content, or developing insightful blogs and educational ebooks, our seasoned marketing team delivers bespoke, on-brand content.

The repeated marketing of the offer helps those at different stages to enroll when they are ready.

Extra's Packages with APD Health Coaching Sessions

The Bupa Healthy Weight Trial Program

The Bupa Healthy Weight Trial Program provided participants with 12-months access to the CSIRO's Total Wellbeing Diet online program with at least 10 health coaching phone calls with an accredited Bupa Telehealth dietitian. Meal plans and advice were personalised to meet participants' specific lifestyle requirements and health diagnostics.

Key outcomes from the pilot

Reported by Sarah Benner, Program Delivery Specialist Bupa, TeleHealth, HealthCare Management and Innovation

- The program was very well received by both coaches and customers, and its straightforward TWD principles helped customers learn how to follow a healthy, balanced diet in a realistic and sustainable way.
- Coaches reported that delivering the CSIRO TWD online program was easy due to its well-structured design, abundant valuable tools and resources, and user-friendly navigation.
- In relation to changes to customer health status, coaches reported two key changes:
 - ✓ Increased understanding of healthy eating given the practical and realistic principles of the TWD
 - ✓ Improved mindset around themselves and their health, including improved confidence and increased awareness around healthy choices

“In particular, one stand out for me is that customers and dietitians have reported that the TWD program is teaching people about healthy eating, maintaining a healthy lifestyle and weight loss in a realistic and sustainable way – I think that is a huge win.”

Sarah Benner, Program Delivery Specialist Bupa, TeleHealth, HealthCare Management and Innovation

What sets us apart - The next evolution in chronic disease

Innovative Features	Why it matters
Digitally delivered program	100% digital, self-paced, access anywhere allowing for scalability and member to engage on their own terms.
24 weeks worth of access to the CSIRO Total Wellbeing Diet	Longer duration supports sustained behaviour change and long-term weight loss maintenance.
Ongoing personalised allied health support	High-touch coaching ensures accountability, engagement, and individualised support for better adherence.
Medical oversight	Professional oversight ensures a tailored approach to managing chronic disease ensuring the right person is on the right program
Nutritional approach	TWLP focuses on long-term habit formation by transitioning from meal replacements to whole-food nutrition.
Technology and AI innovation	CSIRO AI-powered "My Journey" coaching for real-time, personalised goal setting and tracking. AI adapts to members' progress, making weight loss more achievable and sustainable.
Behaviour change model program	TWLP evolves based on the latest behaviour change research to improve outcomes and increase engagement.
Community support	Access to one of Australia's largest online peer-support communities. Community support improves motivation and long-term success.
Scientifically credible	Annual CSIRO reviews & updates integrating the latest health science.
Proven health outcomes	TWLP's whole-food approach yields better long-term metabolic and joint health benefits, leading to participants achieving 7.1% weight loss, 8% cholesterol reduction, 9.93% reduction in joint pressure, and 6.4% blood glucose improvement
Breaking down silos between health providers and insurance	A comprehensive, integrated digital health program that aligns dietitians, RNs, and health fund member programs. Bridging the gap between healthcare providers and health insurers, leading to a seamless member experience.

About the CSIRO Total Wellbeing Diet

The CSIRO Total Wellbeing Diet is a scientific approach to weight loss which combines high protein meal plans with powerful online tracking tools.

Created by the experts at Australia's leading national science agency, the CSIRO, the diet combines the latest nutritional research with practical, easy-to-follow guidelines.

With over a decade of research and numerous success stories, the CSIRO Total Wellbeing Diet has proven effective for thousands of people. Our comprehensive approach not only focuses on what you eat but also on behaviour change, encouraging regular physical activity and mindful eating practices to ensure individuals can maintain their results for the long term.

Health programs tailored to members health conditions

Additional programs to help support health conditions for either CDMP or Primary Prevention solutions

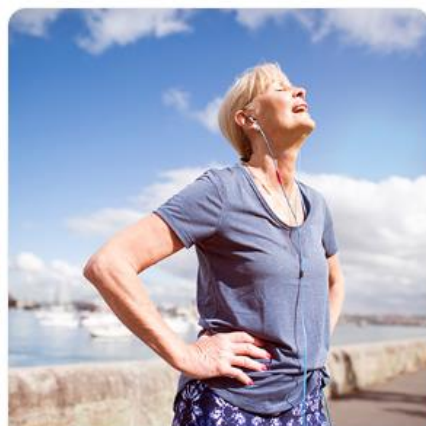

NEW Menopause

A nutrition-based approach to women's wellbeing

Our new Menopause Plan is grounded in the trusted CSIRO Total Wellbeing Diet principles. This program is designed to provide optimal nutrition for women to thrive during this major life phase.

Members learn how to eat for healthy weight management during perimenopause and menopause, how to stabilise energy and hormonal balance through food choices, and access a carefully curated meal plan designed to optimise nutrition during perimenopause, menopause and beyond.

Prediabetes and type 2 diabetes

Support your members in taking control of their health before complications arise.

This program is designed to help members manage their weight and improve blood glucose control—key factors in preventing disease progression.

Through targeted, evidence-based nutrition and tailored educational content, members learn how diet directly impacts their glucose levels. This program empowers them to make sustainable lifestyle changes, reducing long-term health risks and healthcare costs.

High cholesterol

Help your members manage cholesterol and reduce cardiovascular risk.

The High Cholesterol Program offers a scientifically developed, high-protein, low saturated fat meal plan, rich in whole grains, fruits, vegetables, and healthy fats.

This approach supports members in lowering LDL cholesterol and triglyceride levels, contributing to improved heart health. By equipping members with practical, sustainable dietary strategies, this program promotes long-term behaviour change that can prevent more serious cardiac events.

High blood pressure

Partner with us to support members in lowering blood pressure and improving heart health.

Our High Blood Pressure Program focuses on the clinically significant benefits of modest weight loss and improved nutrition. Members are supported to lose weight, reduce their blood pressure, and mitigate the risk of stroke, heart disease, and other chronic conditions.

This preventative approach helps your fund deliver measurable health outcomes while supporting members in achieving a better quality of life.

Joint pain

Improve member mobility and wellbeing by addressing joint pain through lifestyle change.

Excess weight is a major contributor to joint pain and musculoskeletal issues. This program is designed to support members to lose weight safely and effectively, with the goal of reducing pain, increasing mobility, and enhancing overall wellbeing. With a strong focus on nutrition, sustainable behaviour change, and empowerment, this program helps members reclaim their energy and freedom of movement—reducing reliance on medications and other costly interventions.

Option 1: Light touch

CSIRO Total Wellbeing Diet Program Access

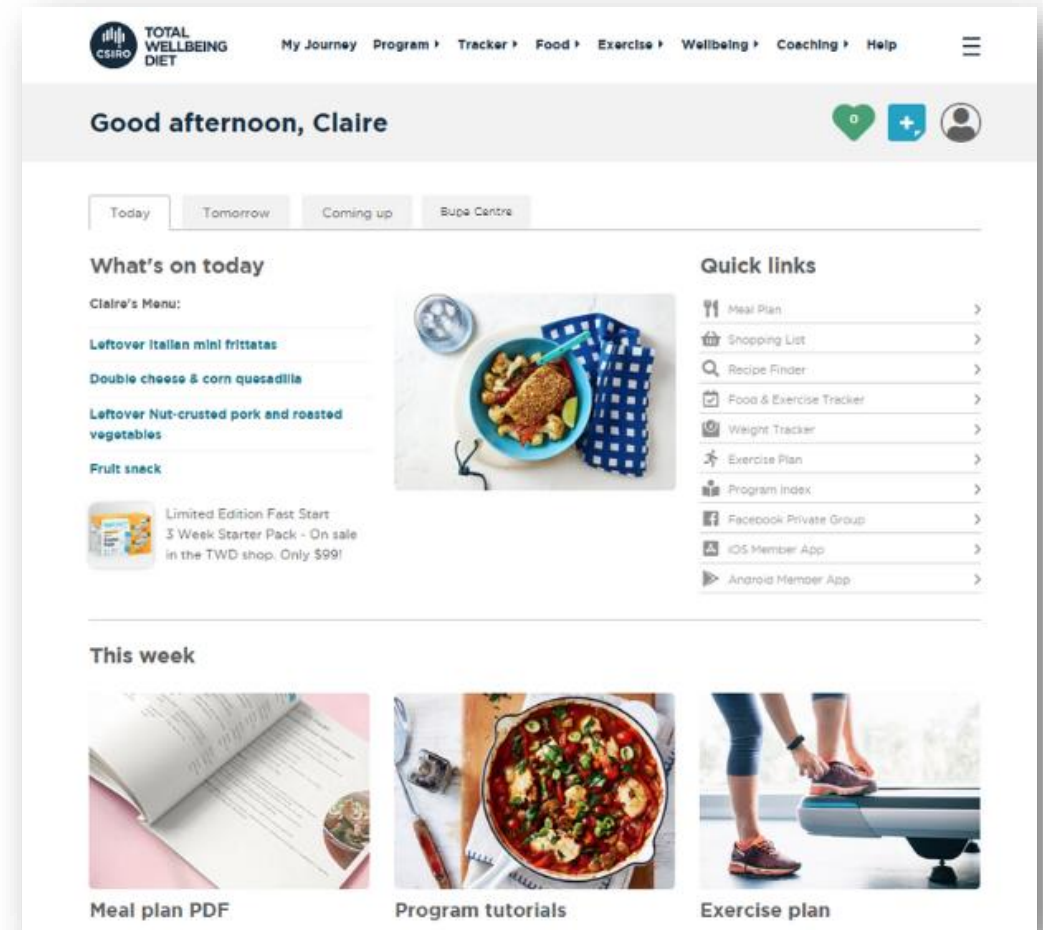

Program Index “Bupa” Tab when someone enters “Bupa” as their health insurance on program set up.

Onboarding training for Bupa staff

Content updateable by the Digital Wellness team on request*

Considerations:

- Time to set up 2 – 3 Months
- Requires Tech lift but minimal
- Long term content management solution. Could it be managed by Bupa’s team? Is there a tech solution?
- All content that is within the “CSIRO Total Wellbeing Diet Program” and not within the “Bupa” section will need to be reviewed and approved by the CSIRO Total Wellbeing Diet team.

Option 1: Full integration

CSIRO Total Wellbeing Diet Program Access

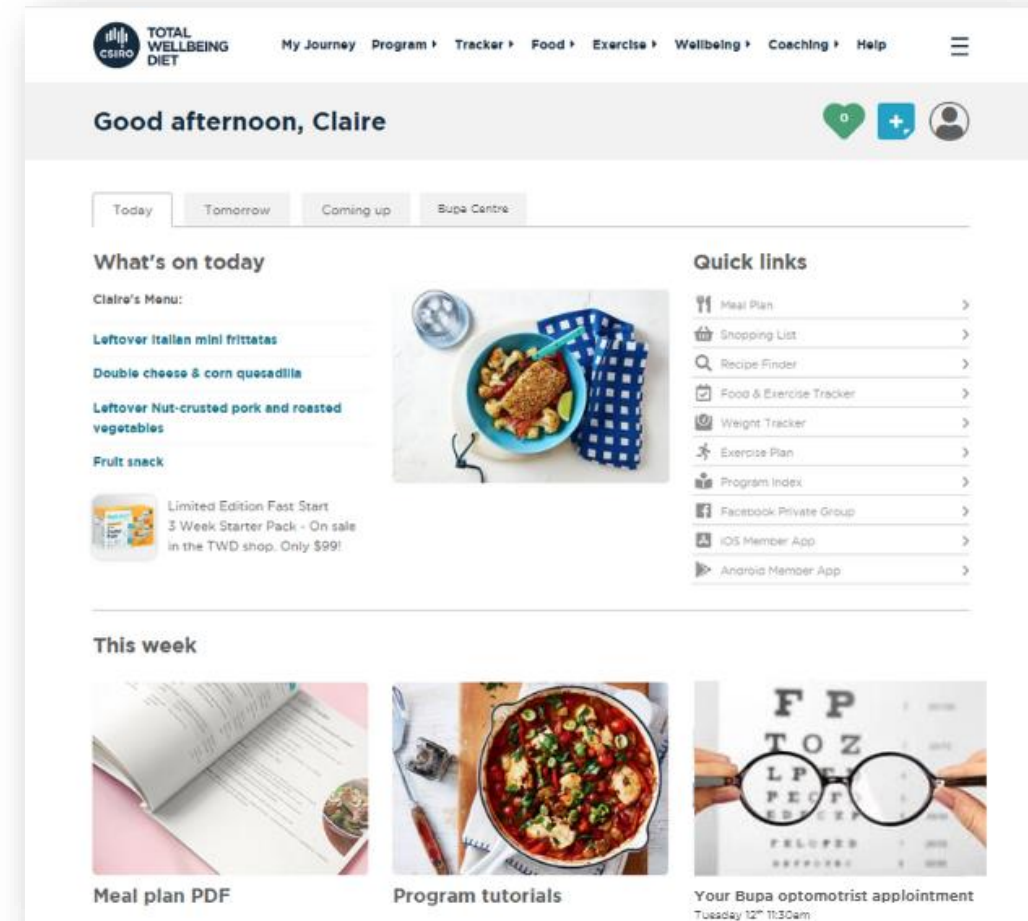

CSIRO Total Wellbeing Diet Portal / Dashboard becomes a secondary Bupa Hub when someone enters “Bupa” as their health insurance on program set up.

Onboarding training for Bupa staff

Content updateable by the Digital Wellness team on request*

Considerations:

- Time to set up 4 – 5 months
- Requires Tech Lift and further scoping by both teams
- Long term content management solution. Could it be managed by Bupa’s team? Is there a tech solution?
- All content that is within the “CSIRO Total Wellbeing Diet Program” and not within the “Bupa” section will need to be reviewed and approved by the CSIRO Total Wellbeing Diet team.

TOTAL
WELLBEING
DIET

“It’s easy to overestimate what’s achievable when setting your own weight loss goals. The program’s personalised goal gave me a realistic starting point that kept me motivated.

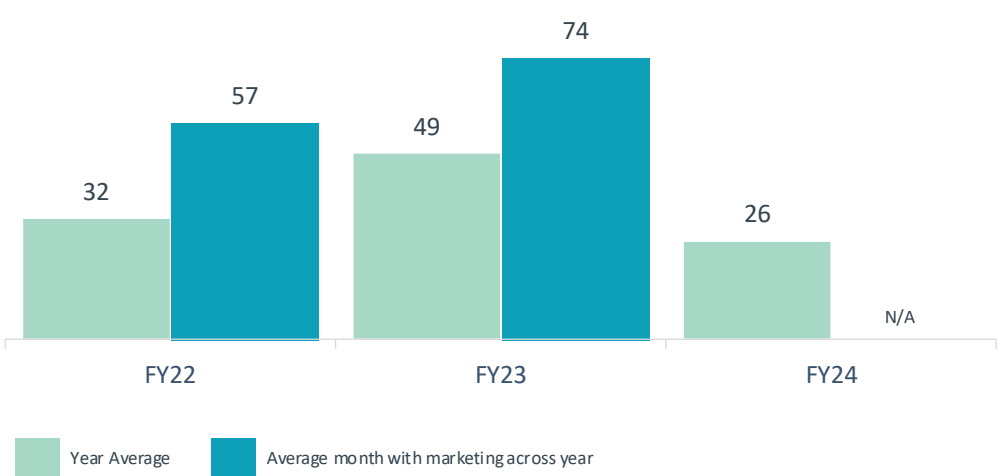

Achieving smaller, tailored milestones along the way made my larger goal feel more attainable and within reach...It just fits in with my lifestyle.

For so many grappling with their health and weight, seeing the results and learning new habits along the way keeps you motivated. It’s going to be one of the most life changing things that you can do and you’ve got this entire support network, just waiting to welcome you.”

Credit usage forecast

Based on past CBHS DW Program Enrolment Data

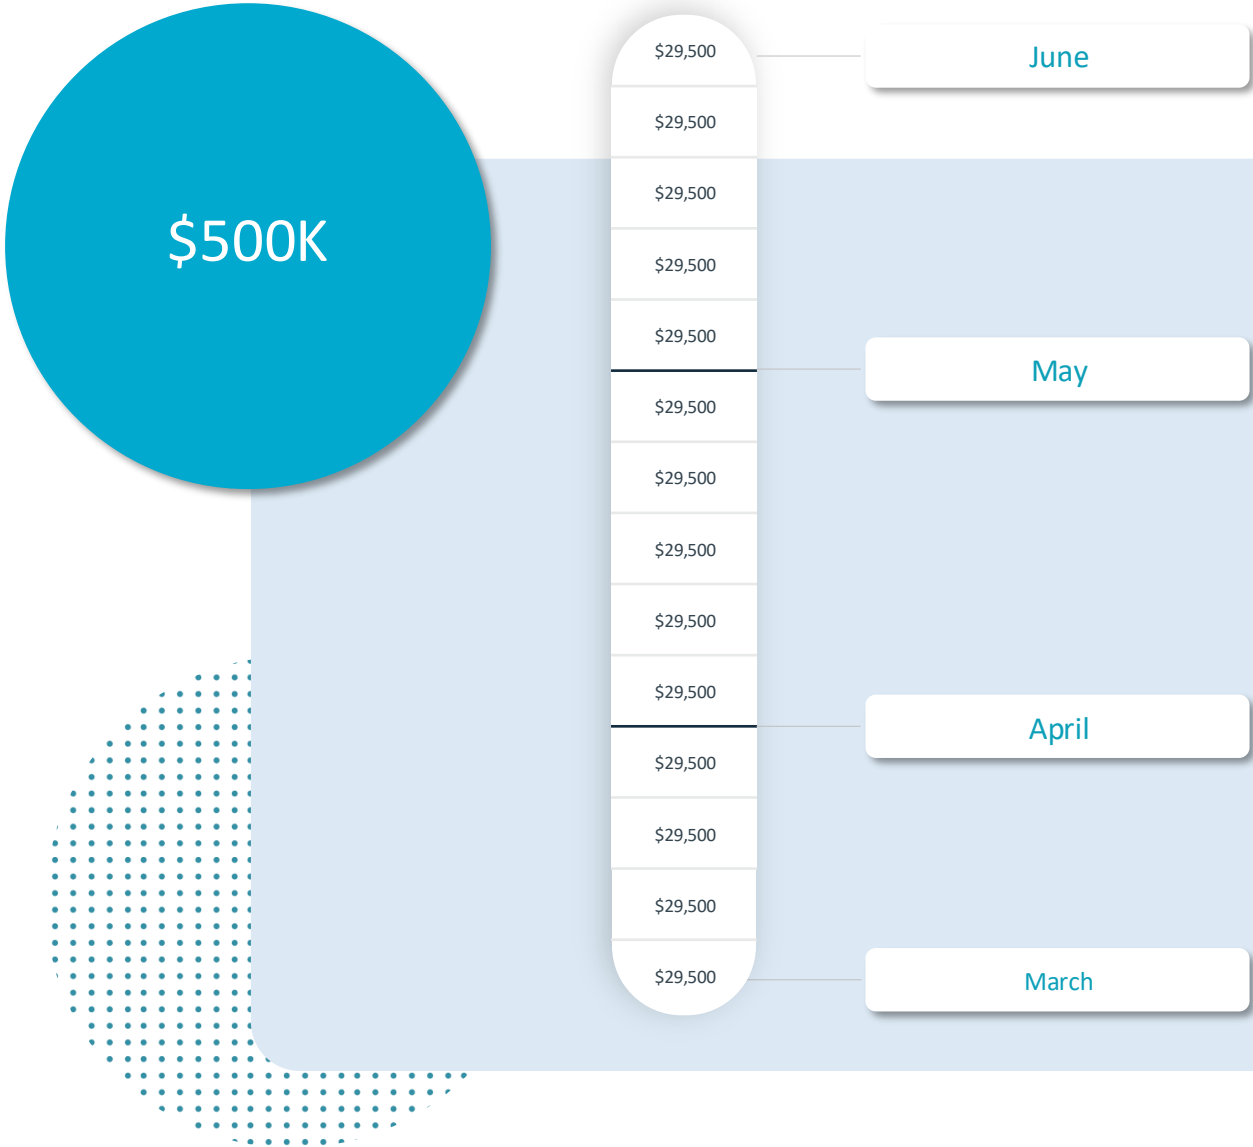

Credit \$250,000		Potential Timeframe at ~30 enrolments/month
Quarterly Reports x 3	(\$1,800 ea.) \$5,400+GST	
1 Annual Cohort Report	\$2,500+GST	
Minimum (\$1,130.96)	~214 enrolments	~ 7 months
Middle (\$1,500)	~162 enrolments	~5 months
Maximum (\$2,060.96)	~118 enrolments	~ 4 months

Go to market suggestion:

Launch with broad marketing, underpinned by clear eligibility criteria message drive early momentum. This approach encourages members to join within a similar timeframe, helping to maximise early credit utilisation.

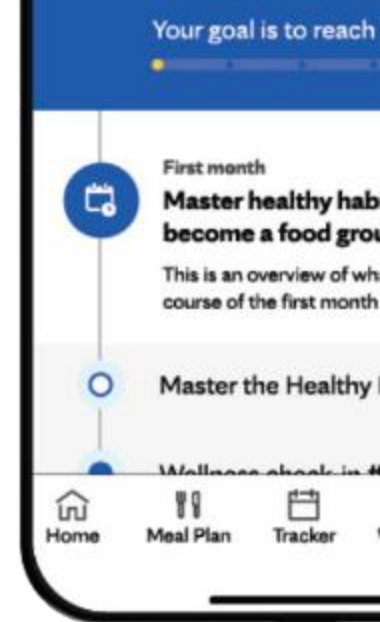

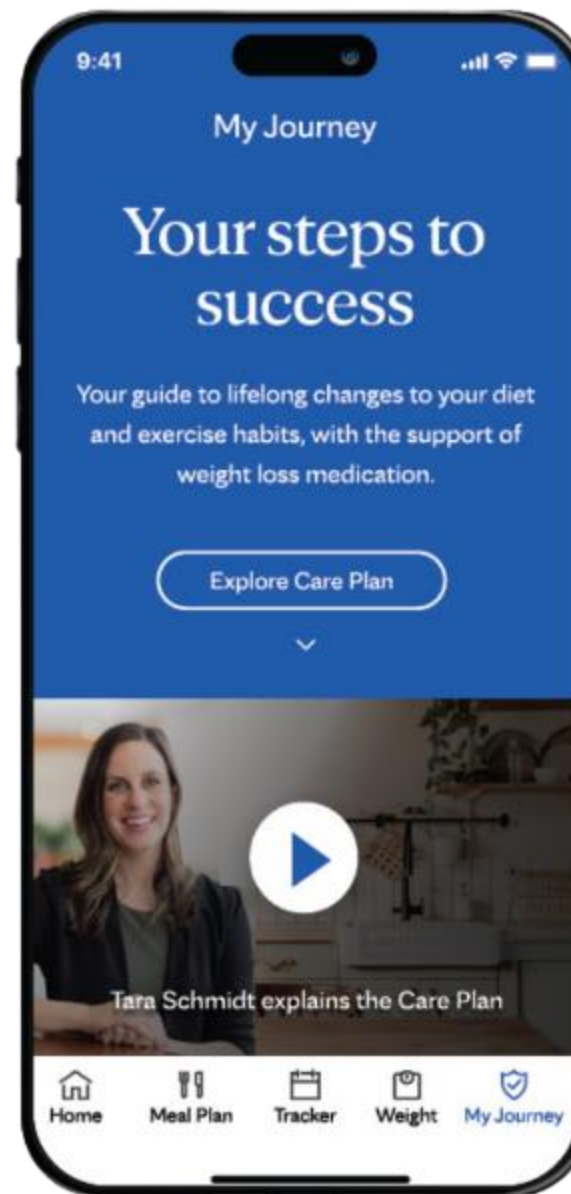

Our team can collaborate with your marketing team align with the monthly marketing calendar for Member Benefits and optimize messaging to deliver a tailored campaign, including a dedicated CSIRO Total Wellbeing Diet landing page, email communications, and social media activations.

Let's get it done!

Webinar brief

This exclusive, 1-hour webinar hosted by the CSIRO Total Wellbeing Diet aims to highlight the value HBF brings to its members by investing in their health and wellbeing. It will showcase the importance of preventative health, supporting members in their journey to get healthy, stay healthy, and achieve sustainable lifestyle changes. HBF’s partnership with the CSIRO Total Wellbeing Diet is designed to empower members with science-backed knowledge and practical tools to manage their health, reinforcing that HBF truly cares about their long-term wellbeing.

Objective:

- Demonstrate HBF’s commitment to preventative health and member wellbeing.
- Showcase how members can access innovative health programs like the CSIRO Total Wellbeing Diet through their health cover.
- Offer actionable advice on sustainable weight management and lifestyle habits.
- Strengthen member trust by providing expert insights from industry-leading talent.
- Reinforce that HBF supports them not just in times of illness, but throughout their wellness journey.

Details

- Duration:** 1 hour
- Date:** 11th March
- Audience:** HBF members
- Format:**
- 5 minute introduction by Nicole Pritchard.
 - 30-minute presentation by the expert speaker, on chosen topic
 - 10-minute talk by success story *(If we can source a HBF member who has completed the program via their health cover and is interested in talking about their experience)*
 - 5 minute conclusion by Nicole Pritchard on HBF and the CSIRO TWD Program
 - 10-minute Q&A session to engage members directly with the expert

Talent Option 1: Nicole Pritchard, Head of Health Programs, APD

Nicole Pritchard is an Accredited Practising Dietitian (APD), seasoned health coach, and Head of Health Programs at Digital Wellness, the parent company of the CSIRO Total Wellbeing Diet.

With over 17 years experience, Nicole has become a trusted expert in evidence-based weight loss and behaviour change, helping Australians achieve sustainable health improvements.

Nicole's practical, science-backed approach focuses on realistic strategies that empower people to take control of their health. She is passionate about behaviour change models that foster long-term habits, helping individuals stay motivated and on track—especially when challenges arise.

As the lead dietitian for the CSIRO Total Wellbeing Diet, Nicole plays a pivotal role in program development, ensuring members receive the guidance, tools, and support they need to succeed.

Nicole has been featured on CH7, Sunrise, The Carousel, and Bounty Parents, offering expert advice to a wide audience. She is also a sought-after speaker on topics ranging from weight loss strategies to family nutrition and sustainable lifestyle habits.

A mother of two young children based in Wollongong, Nicole brings her personal experience as a working

parent into her practice, understanding the complexities of balancing family, career, and wellbeing. She actively promotes a realistic, balanced approach to healthy living—whether it's through meal planning, quick exercise sessions, or fostering positive eating habits at home.

Nicole is available for:

- Media interviews and TV appearances on health, weight loss, and nutrition
- PR campaigns and content partnerships in health and wellness
- Presentations and webinars on behaviour change, sustainable weight loss, and healthy lifestyle strategies

Past Media:

Talent Option 2: Dr Joanna McMillian, Nutrition scientist

A regular on TV across all channels, Jo appeared as a host on ABC's flagship science show Catalyst – The Truth About Fasting, Beating Diabetes and the three-part series Gut Revolution – as the 'good chef' on Good Chef Bad Chef, and has appeared regularly on the Nine Network's Today Show for almost 20 years.

Jo is a popular guest on a variety of radio networks and podcasts, as well as contributing to online and print publications, including her popular long-running column My Day on a Plate in Sunday Life.

With a passion for busting the misinformation and conflicting messages that abound on the topic of nutrition and lifestyle choices for the health of both us and our planet, Jo says:

"My goal is to translate the science and emerging research into what that really means for us all, now and in the future, in terms of what and how we eat, and the lifestyle choices we make, to help us to look and feel our best at every age, while giving us the best chance of optimal health. Importantly it should add joy and pleasure to life, not take it away! At the same time, we increasingly have to think about how these choices impact the health of our planet, shaping the way we eat in the future."

Jo has a natural ability to translate complex science into simple, everyday messages that engage; benefiting the wellbeing of audiences across all media platforms, be it broadcast, audio, print or in front of a live audience.

Truly understanding the business of food, Jo has worked as an independent nutrition consultant to many food companies and industries over the years providing support and guidance in key decisions affecting nutrition guidelines, product development and consumer interest. She is also a non-executive director at Cobram Estate Olives.

With a powerful, passionate and relaxed presenting style, Jo holds the attention of audiences wherever she goes. Her versatility as a speaker has allowed her to not only deliver workshops and keynotes but also to host and moderate large scale corporate and high-profile public events including her role as interviewer for Jamie Oliver on his last trip to Australia.

Jo is an Adjunct Senior Research Fellow with La Trobe University, a Fellow of the Australasian Society of Lifestyle Medicine and a Graduate of the Australia Institute of Company Directors. Passionate about understanding the impact of our diets on the

sustainability of our world, Jo recently completed her certification in Sustainable Food: Production and Processing from the University of Cambridge, solidifying her skills and experience and passion in this area.

She has authored eight books and four Audible books (Gutfull, Mindfull, Heartfull & Food Fight) and is a proud ambassador for Diabetes Australia, Foodbank and The Orangutan Alliance.

Joanna is available for keynotes, brand and campaign partnering, content creation and media opportunities.

EXPERTS

Talent Option 3: Dr Ginni Mansberg, GP & TV presenter

Voted Australia's most trusted healthcare professional, "Sunrise GP", Ginni is a medico with more than 25 years of experience and a specialist in all things women's health, menopause, parenting, skin and preventative health.

She is Channel 7's resident GP on Sunrise and The Morning Show, host of Channel9's Embarrassing Bodies Australia, and expert on SBS's Medicine or Myth.

She's the author of six books including best sellers The M Word- How to Thrive in Menopause (2024) and Save Your Brain (2023) was released earlier this year and a recognised speaker, podcast host and creator.

Ginni delivers easy to understand, scientifically validated health advice, all delivered without judgement and with her customary sense of humour.

She's a popular choice for content and campaign partnerships, broadcast opportunities and presenting. Having completed a Graduate Diploma of Journalism at UTS, she is also a best-selling author and has worked extensively as a medical journalist, contributing regular feature articles and columns for a range of consumer and trade publications.

In addition to her clinical and media work, she also sits on a number of Advisory Board, and is a supervisor in the medical faculty at the University of Notre Dame. Ginni also runs a medical consulting practice and is the cofounder and Medical Director of cosmeceutical skincare company, ESK as well as her workplace wellness company, Don't Sweat It Menopause in the Workplace.

Dr Ginni is available for media interviews and appearances, PR campaigns, and TV and radio presenting.

E-books

Additional campaign idea

Lead Gen – ebook

The e-book campaign aims to alleviate the pressure on your marketing team by offering a valuable content piece directly to your members. The e-book will be hosted on the CSIRO Total Wellbeing Diet website, requiring members to consent to receiving communications about programs offered in partnership with your fund. This ensures that these leads are segmented into an "Enterprise Leads bucket," specifically for targeted partnership-related campaigns, without entering the consumer pool of the CSIRO Total Wellbeing Diet. This strategy reduces the need to compete for year-round marketing real estate and provides a clear value-add to your members.

A closer look at world data

The financial impacts of overweight and obesity to PHI – High Level Estimates

A study published in the MJA showed total direct costs per person increased by **89%** with obesity

...and the 45-and-up study data attributes 1 in every 6 dollars spent on hospitalisation to overweight and obesity

In addition, the TWLP outcomes findings can be translated into significant PHI claims cost reduction*

Weight loss of 6.9kg in insured females aged 50-64 can reduce predicted all-cause hospital activity resulting in an estimated **direct hospital claims cost by \$33m in one year.**

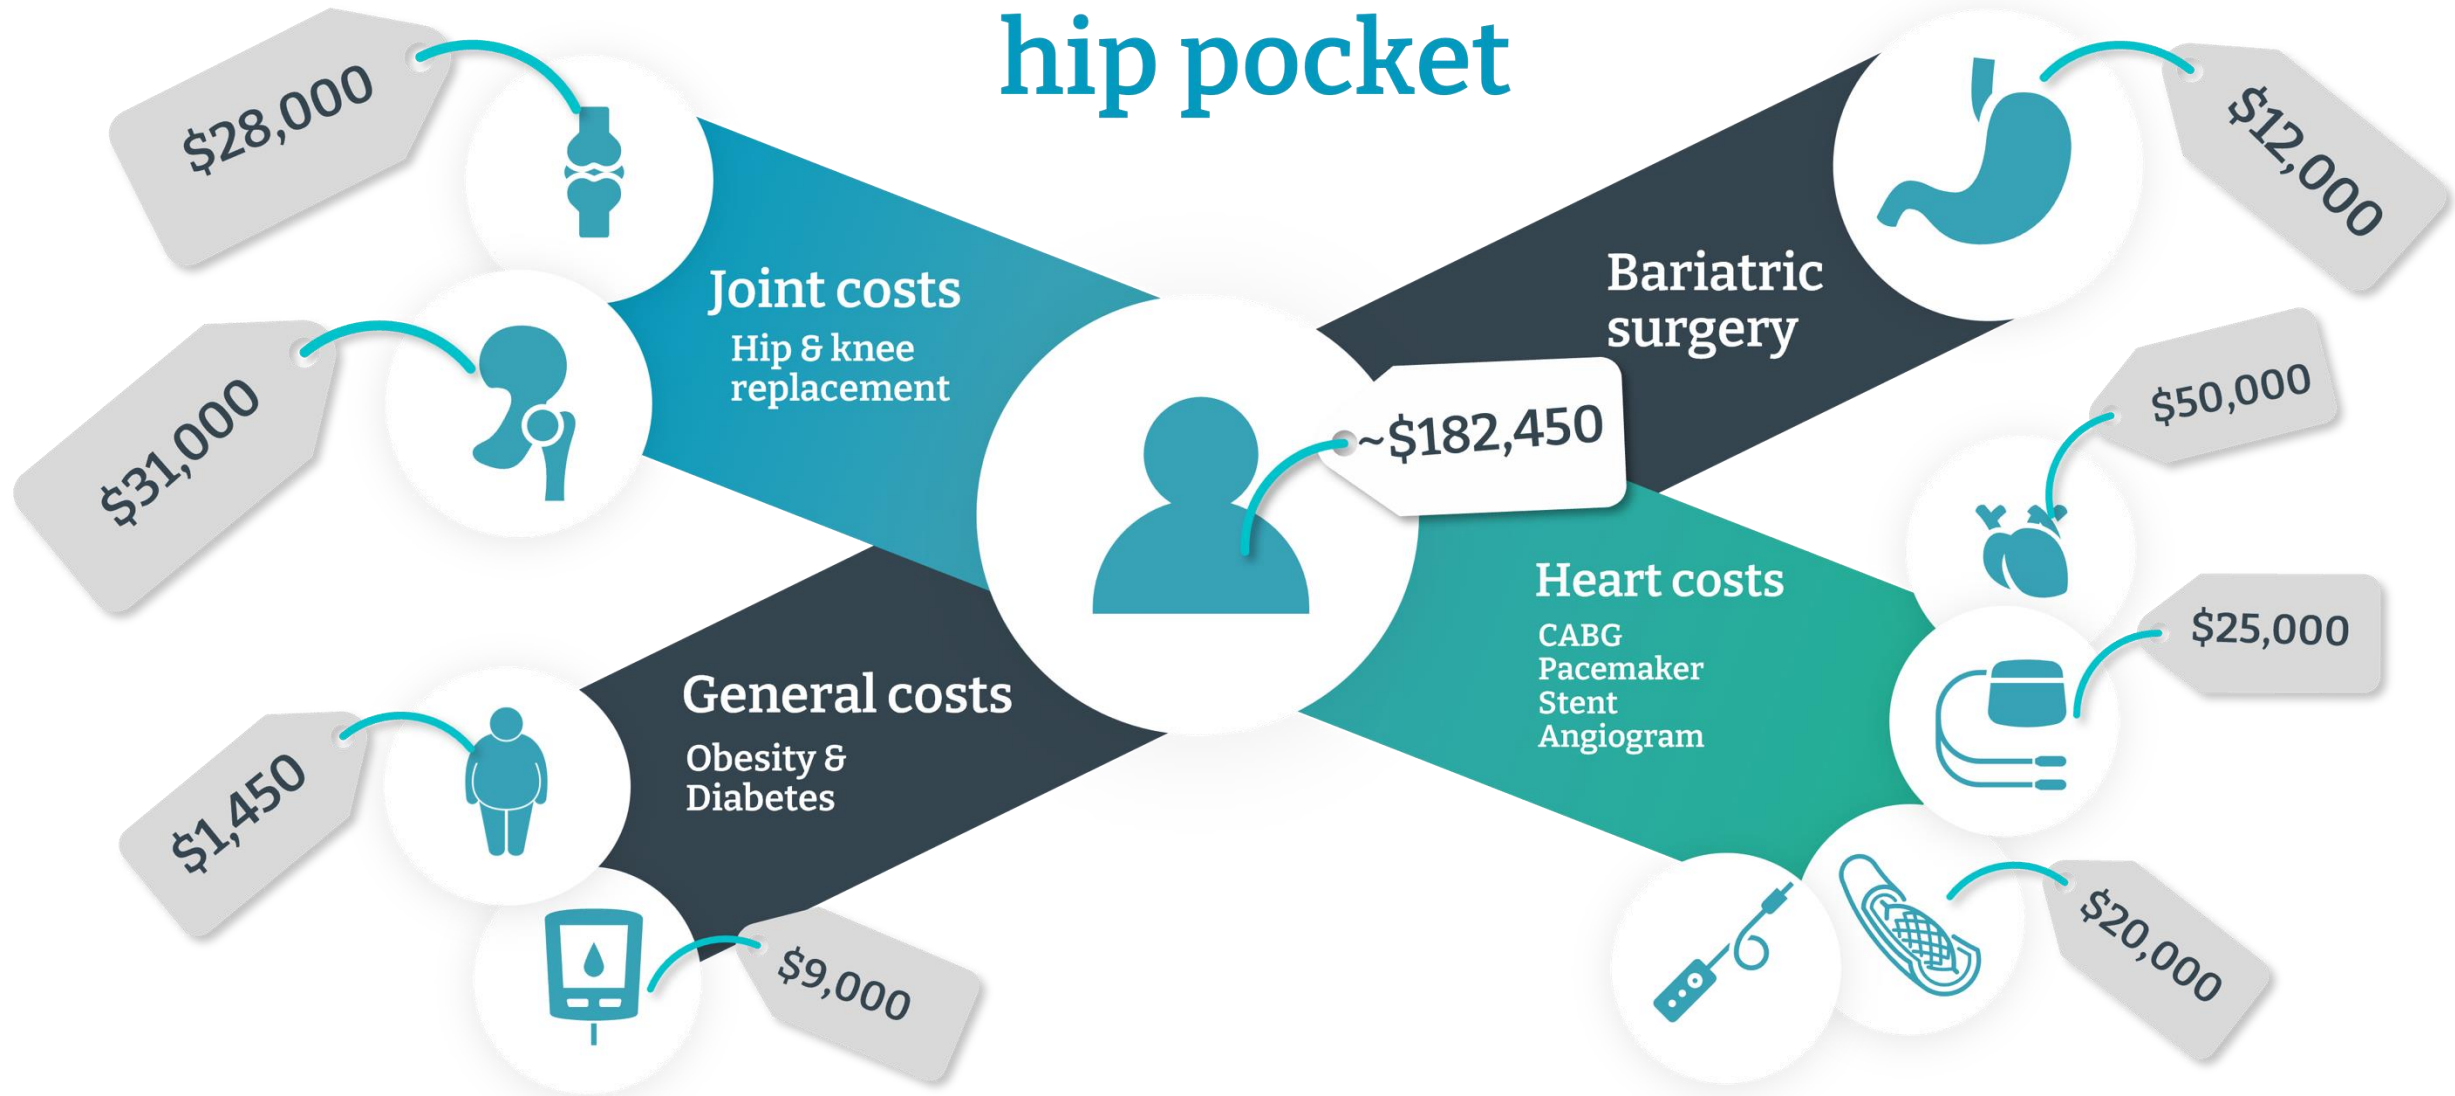

A 5% reduction in weight in post-menopausal females is estimated to reduce the incidence of breast cancer and associated **claims expense by close to \$4m in one year.**

A shift to a healthier weight category leads to an estimated **reduction in direct hospital costs of \$50m** in one year, from a reduction in ischaemic heart disease and fewer knee replacements.

A 24% reduction in obesity is estimated to reduce hospital attendance amongst the most frequent hospital attendees, resulting in a **claims reduction of \$49m per year** in direct hospital costs.

** in each case the impact is assumed to be only as large as the same proportion of TWLP completing participants, and only the estimated PHI claims contribution is stated.*

We also know...

A 24% reduction in obesity

is estimated to reduce hospitalisation attendance amongst the most frequent hospital attendees, resulting in a claims reduction of \$49 million per year.

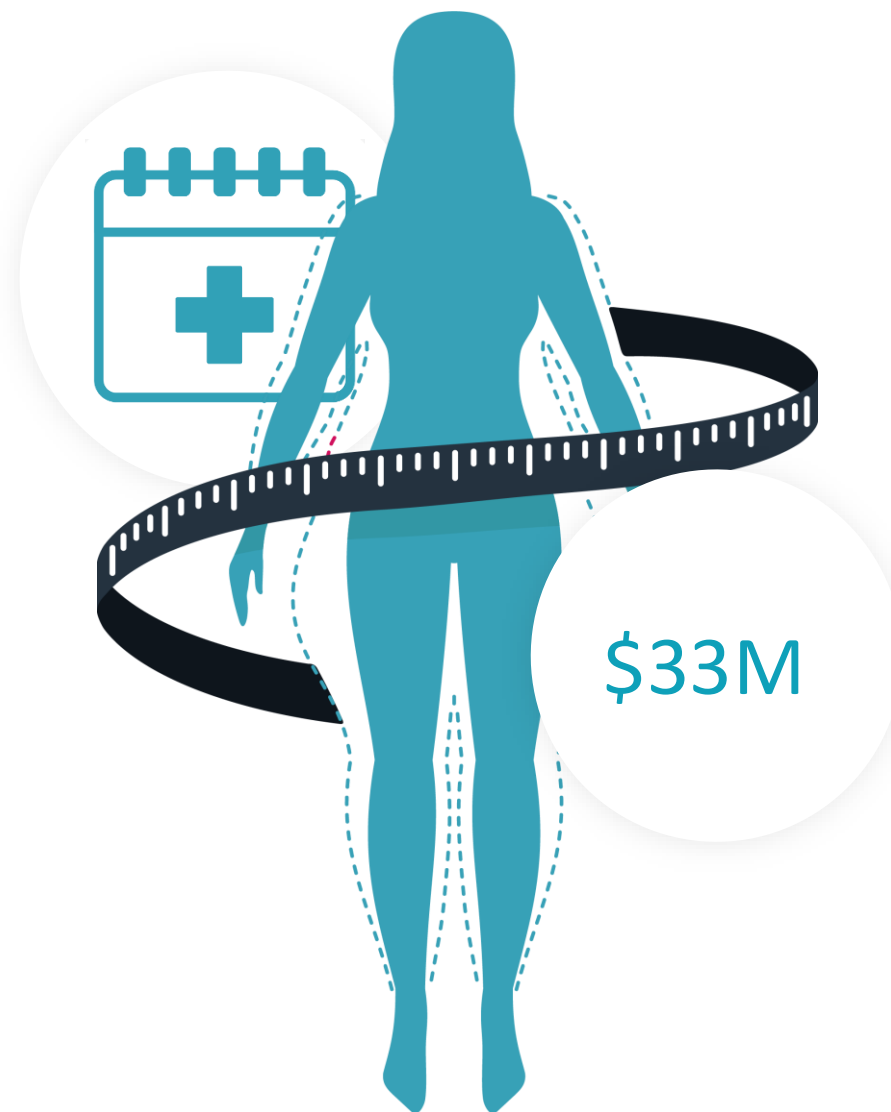

Weight loss of 6.9kg

in insured females aged 50 - 64 can reduce predicted all-cause hospital activity. Resulting in an estimated direct hospital claims cost reduction of \$33 million in one year.

5% Reduction in weight post-menopausal females

is estimated to reduce the incidence of breast cancer and associated claims expense by close to \$4 million in one year.

How do we measure Return on investment?

To effectively measure the return on investment (ROI) of our digital health program, we focus on key metrics that capture both clinical outcomes and financial performance.

These metrics ensure the program delivers meaningful health improvements for members while also providing value to health funds. By driving sustained behavioural change, enhancing member satisfaction, and reducing healthcare costs, we can demonstrate the true impact of the program in achieving long-term health and economic benefits.

Health Outcomes

Ensure the majority of members achieve clinically significant health improvements in obesity and at least one other comorbidity.

Member Satisfaction and User Experience

Measure member satisfaction with the program and user experience, enhancing the perceived value of their health fund cover.

Cost Savings from Reduced Healthcare Claims

Achieve lower healthcare claims by reducing the need for medical interventions and hospital visits.

Long-term Member Retention

Increase member loyalty and retention, boosting the lifetime value of each member.

Behavioural Change and Adherence Rates

Track sustained behavioural changes and program adherence to demonstrate long-term effectiveness.

Reduction in Chronic Disease Management Costs

Decrease costs associated with managing chronic conditions such as hypertension, diabetes, and cardiovascular diseases.

Referral and Advocacy

Encourage member referrals and advocacy, increasing program participation without additional marketing expenses.

These measures provide a comprehensive framework to evaluate the ROI of your digital health program, ensuring both clinical and financial benefits are achieved.

Understanding the success and challenges of CSIRO Total Wellbeing Diet members over a one-year period

CSIRO April 2023 Study: Emily Brindal, Gilly Hendrie, Genevieve James-Martin, Danielle Baird, Paige Brooker, Gemma Williams, Kim Anastasiou.

An analysis of **n=157,255 members** from the CSIRO Total Wellbeing Diet online platform to examine **weight loss results beyond the initial 12 weeks of the program** and explore common patterns of weight loss and platform usage associated with greater weight loss success.

The results of this study provide a greater understanding of impacts of the CSIRO Total Wellbeing Diet beyond the initial 12 weeks, and the **factors associated with long term behaviour change and establishment of lifelong habits.**

Long term study report -

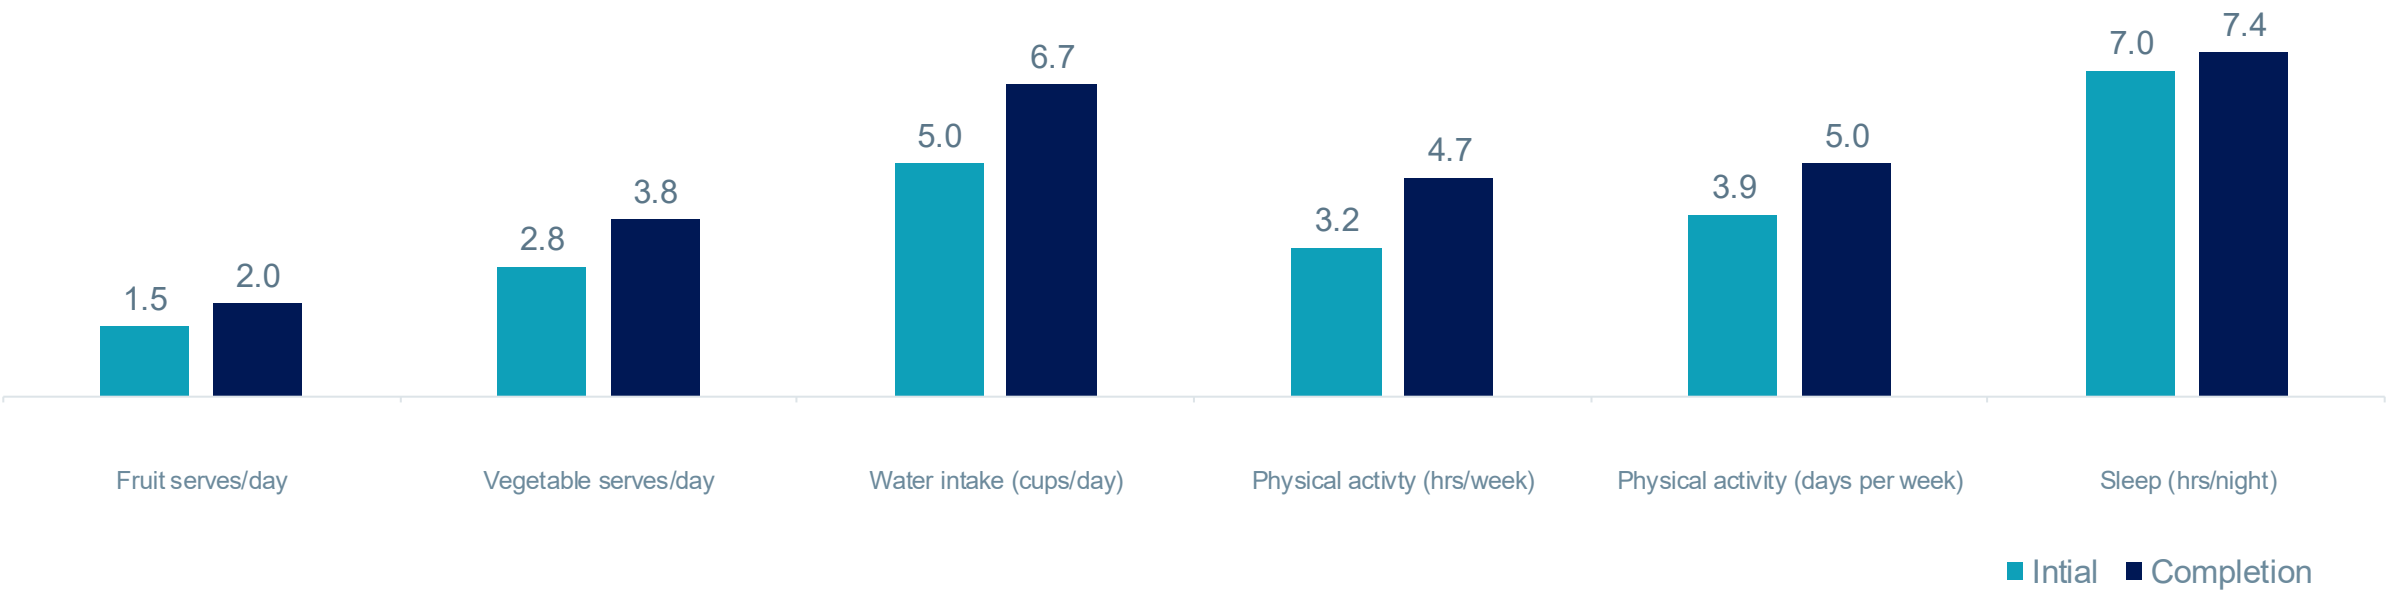

Behavioural Outcomes

Whilst primary goals of the Total Wellbeing Lifestyle Plan is for weight loss and clinical health outcomes, the secondary objectives are related to increased fruit and vegetable consumption, increased physical activity levels and long-term behaviour change.

On analysis of the members who had data at the start and end of the program, and improvement was seen across all behavioural measures.

There was a 36% increase in vegetable intake, 33% increase in fruit intake, and hours of physical activity per week increased by 47%, from 3.2 hours to 4.7 hours per week.

N=886 members who completed an initial and completion assessment between June 2023 and July 2024

Behavioural findings

A common pattern to weight loss was to lose weight in the first 6 months and then enter a weight maintenance stage. However, the study found that 54% of survey participants who had lost 14kg or more had been able to continue weight loss, by building up positive habits over time.

- Studies of long-term weight maintainers suggest there are some common behavioural strategies associated with success, such as frequent self-monitoring of body weight and food intake.
- Studies also suggest that people who lose large amounts of weight and keep it off report that over time it gets easier to maintain weight loss.
- From the survey data, vitality, defined as having positive energy, predicted greater lifetime weight loss, and those who achieved good weight loss over more than 2 years also reflected on the way their weight loss had improved their levels of energy.

Key behaviour contributing factors to long-term weight loss success

Accountability:

Tracking, a key form of self-monitoring, was identified as an important behaviour associated with long-term weight loss success. Regular weigh-ins is important for weight loss success, and participants willingness to jump back on the scales to review their weight may be critical for weight loss maintenance as it allowed people to recalibrate and remain accountable. There were significant positive correlations ($p < 0.01$), of moderate strength, between total usage of the platform, and usage of several features, and total and percentage weight loss. The strongest correlations were between total platform activity ($r = 0.364$) and percentage weight loss, food diary entries and percentage weight loss ($r = 0.345$), and weigh ins and percentage weight loss ($r = 0.252$).

Most people reported that they were still monitoring their weight on a weekly basis (44%), or at least weekly (daily + weekly, 64%).

Education:

Another theme, supported by both the survey and the interview data, was the importance of people's ability to understand and adapt dietary principles into everyday eating.

Members reported flexibility and adaptability to be a benefit of the Total Wellbeing Diet over other diets. In the interviews people spoke about the key to success of long-term weight management being about lifestyle change and being able to apply their knowledge of dietary principles of the Total Wellbeing Diet to suit their needs.
